

**FEDERALLY ENFORCEABLE STATE
OPERATING PERMIT (FESOP) RENEWAL
OFFICE OF AIR QUALITY**

**Modine Manufacturing Company
239 Factory Street
LaPorte, Indiana 46350**

(herein known as the Permittee) is hereby authorized to operate subject to the conditions contained herein, the source described in Section A (Source Summary) of this permit.

This permit is issued in accordance with 326 IAC 2 and 40 CFR Part 70 Appendix A and contains the conditions and provisions specified in 326 IAC 2-8 as required by 42 U.S.C. 7401, et. seq. (Clean Air Act as amended by the 1990 Clean Air Act Amendments), 40 CFR Part 70.6, IC 13-15 and IC 13-17.

Operation Permit No.: F 091-14016-00025	
Issued by:Original signed by Paul Dubenetzky Paul Dubenetzky, Branch Chief Office of Air Quality	Issuance Date: February 25, 2002 Expiration Date: February 25, 2007

TABLE OF CONTENTS

SECTION A SOURCE SUMMARY

- A.1 General Information [326 IAC 2-8-3(b)]
- A.2 Emission Units and Pollution Control Equipment Summary [326 IAC 2-8-3(c)(3)]
- A.3 Insignificant Activities [326 IAC 2-7-1(21)] [326 IAC 2-8-3(c)(3)(I)]
- A.4 FESOP Applicability [326 IAC 2-8-2]
- A.5 Prior Permits Superseded [326 IAC 2-1.1-9.5]

SECTION B GENERAL CONDITIONS

- B.1 Permit No Defense [IC 13]
- B.2 Definitions [326 IAC 2-8-1]
- B.3 Permit Term [326 IAC 2-8-4(2)]
- B.4 Enforceability [326 IAC 2-8-6]
- B.5 Termination of Right to Operate [326 IAC 2-8-9] [326 IAC 2-8-3(h)]
- B.6 Severability [326 IAC 2-8-4(4)]
- B.7 Property Rights or Exclusive Privilege [326 IAC 2-8-4(5)(D)]
- B.8 Duty to Supplement and Provide Information [326 IAC 2-8-3(f)] [326 IAC 2-8-4(5)(E)]
- B.9 Compliance Order Issuance [326 IAC 2-8-5(b)]
- B.10 Compliance with Permit Conditions [326 IAC 2-8-4(5)(A)] [326 IAC 2-8-4(5)(B)]
- B.11 Certification [326 IAC 2-8-3(d)] [326 IAC 2-8-4(3)(C)(i)] [326 IAC 2-8-5(1)]
- B.12 Annual Compliance Certification [326 IAC 2-8-5(a)(1)]
- B.13 Preventive Maintenance Plan [326 IAC 1-6-3] [326 IAC 2-8-4(9)] [326 IAC 2-8-5(a)(1)]
- B.14 Emergency Provisions [326 IAC 2-8-12]
- B.15 Deviations from Permit Requirements and Conditions [326 IAC 2-8-4(3)(C)(ii)]
- B.16 Permit Modification, Reopening, Revocation and Reissuance, or Termination
- B.17 Permit Renewal [326 IAC 2-8-3(h)]
- B.18 Permit Amendment or Revision [326 IAC 2-8-10] [326 IAC 2-8-11.1]
- B.19 Operational Flexibility [326 IAC 2-8-15]
- B.20 Permit Revision Requirement [326 IAC 2-8-11.1]
- B.21 Inspection and Entry [326 IAC 2-8-5(a)(2)] [IC 13-14-2-2]
- B.22 Transfer of Ownership or Operational Control [326 IAC 2-8-10]
- B.23 Annual Fee Payment [326 IAC 2-7-19] [326 IAC 2-8-4(6)] [326 IAC 2-8-16]

SECTION C SOURCE OPERATION CONDITIONS

Emission Limitations and Standards [326 IAC 2-8-4(1)]

- C.1 Overall Source Limit [326 IAC 2-8]
- C.2 Opacity [326 IAC 5-1]
- C.3 Open Burning [326 IAC 4-1] [IC 13-17-9]
- C.4 Incineration [326 IAC 4-2] [326 IAC 9-1-2(3)]
- C.5 Fugitive Dust Emissions [326 IAC 6-4]
- C.6 Operation of Equipment [326 IAC 2-8-5(a)(4)]
- C.7 Stack Height [326 IAC 1-7]
- C.8 Asbestos Abatement Projects [326 IAC 14-10] [326 IAC 18] [40 CFR 61 Subpart M]

Testing Requirements [326 IAC 2-8-4(3)]

- C.9 Performance Testing [326 IAC 3-6]

Compliance Requirements [326 IAC 2-1.1-11]

- C.10 Compliance Requirements [326 IAC 2-1.1-11]

Compliance Monitoring Requirements [326 IAC 2-8-4] [326 IAC 2-8-5(a)(1)]

- C.11 Compliance Monitoring [326 IAC 2-8-4(3)] [326 IAC 2-8-5(a)(1)]
- C.12 Monitoring Methods [326 IAC 3] [40 CFR 60][40 CFR 63]

Corrective Actions and Response Steps [326 IAC 2-8-4] [326 IAC 2-8-5(a)(1)]

- C.13 Risk Management Plan [326 IAC 2-8-4] [40 CFR 68.215]
- C.14 Compliance Response Plan - Preparation, Implementation, Records, and Reports [326 IAC 2-8-4, 5]
- C.15 Actions Related to Noncompliance Demonstrated by a Stack Test [326 IAC 2-8-4, 5]

Record Keeping and Reporting Requirements [326 IAC 2-8-4(3)]

- C.16 General Record Keeping Requirements [326 IAC 2-8-4(3)] [326 IAC 2-8-5]
- C.17 General Reporting Requirements [326 IAC 2-8-4(3)(C)] [326 IAC 2-1.1-11]

Stratospheric Ozone Protection

- C.18 Compliance with 40 CFR 82 and 326 IAC 22-1

SECTION D.1 FACILITY OPERATION CONDITIONS: Three (3) Paint Booths

Emission Limitations and Standards [326 IAC 2-8-4(1)]

- D.1.1 Volatile Organic Compounds (VOC) [326 IAC 2-8-4]
- D.1.2 Hazardous Air Pollutants (HAPs) [326 IAC 2-8-4]
- D.1.3 Volatile Organic Compounds (VOC) [326 IAC 8-2-9]
- D.1.4 Particulate Matter (PM and PM₁₀) [326 IAC 2-2] [40 CFR 52.21][326 IAC 2-8-4]
- D.1.5 Particulate Matter (PM) [326 IAC 6-3-2]
- D.1.6 Preventive Maintenance Plan [326 IAC 2-8-4(9)]

Compliance Determination Requirements

- D.1.7 Volatile Organic Compounds (VOC)
- D.1.8 VOC Emissions
- D.1.9 Hazardous Air Pollutants (HAPs)
- D.1.10 HAP Emissions
- D.1.11 Particulate Matter (PM)

Compliance Monitoring Requirements [326 IAC 2-8-4] [326 IAC 2-8-5(a)(1)]

- D.1.12 Monitoring
- D.1.13 Nonapplicability of Visible Emissions Notations

Record Keeping and Reporting Requirements [326 IAC 2-8-4(3)] [326 IAC 2-8-16]

- D.1.14 Record Keeping Requirements
- D.1.15 Reporting Requirements

SECTION D.2 FACILITY OPERATION CONDITIONS: Insignificant Activities

Emission Limitations and Standards [326 IAC 2-8-4(1)]

- D.2.1 Particulate Matter (PM) [326 IAC 6-3-2]

Certification

Emergency Occurrence Report

Quarterly Reports (4)

Quarterly Deviation and Compliance Monitoring Report

SECTION A

SOURCE SUMMARY

This permit is based on information requested by the Indiana Department of Environmental Management (IDEM), Office of Air Quality (OAQ). The information describing the source contained in Conditions A.1 through A.3 is descriptive information and does not constitute enforceable conditions. However, the Permittee should be aware that a physical change or a change in the method of operation that may render this descriptive information obsolete or inaccurate may trigger requirements for the Permittee to obtain additional permits or seek modification of this permit pursuant to 326 IAC 2, or change other applicable requirements presented in the permit application.

A.1 General Information [326 IAC 2-8-3(b)]

The Permittee owns and operates a stationary radiator and condenser manufacturing source.

Authorized Individual:	John J. Hankey
Source Address:	239 Factory Street, LaPorte, Indiana 46350
Mailing Address:	239 Factory Street, LaPorte, Indiana 46350
General Source Phone Number:	(262) 636-1200
SIC Code:	3443
County Location:	LaPorte
Source Location Status:	Attainment for all criteria pollutants
Source Status:	Federally Enforceable State Operating Permit (FESOP) Minor Source, under PSD Rules; Minor Source, Section 112 of the Clean Air Act

A.2 Emission Units and Pollution Control Equipment Summary [326 IAC 2-8-3(c)(3)]

This stationary source consists of the following emission units and pollution control devices:

- (a) One (1) paint booth, known as the Core and Header Paint Booth (EU8), equipped with air atomization spray guns and dry filters for air pollution control and exhausting to stack 11, capacity 15.0 metal parts per hour.
- (b) One (1) paint booth, known as the Sheet Metal Paint Booth (EU11), equipped with air atomization spray guns and dry filters for air pollution control and exhausting to stacks 14 and 15, capacity 30.0 metal parts per hour.
- (c) One (1) paint booth, known as the Bolted Paint Booth (EU35), equipped with air atomization spray guns and dry filters for air pollution control and exhausting to stack 50, capacity 15.0 metal parts per hour.

A.3 Insignificant Activities [326 IAC 2-7-1(21)] [326 IAC 2-8-3(c)(3)(I)]

This stationary source also includes the following insignificant activities, as defined in 326 IAC 2-7-1(21):

- (a) Natural gas-fired combustion sources with heat input equal to or less than ten million (10,000,000) Btu per hour, including many of the insignificant activities listed, and the following facilities with emissions resulting only from combustion:
 - (1) One (1) natural gas fired Core and Header dry off oven with a maximum heat input capacity of 2.0 million British thermal units per hour.
 - (2) Nine (9) natural gas fired makeup air units with maximum heat input capacities of 4.59 million British thermal units per hour, each.

- (3) Fourteen (14) natural gas fired unit heaters with maximum heat input capacities of 0.17 million British thermal units per hour, each.
- (4) Two (2) natural gas fired receiving heaters with maximum heat input capacities of 0.20 million British thermal units per hour, each.
- (5) Three (3) natural gas fired unit heaters with maximum heat input capacities of 0.28 million British thermal units per hour, each.
- (b) Storage tanks with capacity less than or equal to 1,000 gallons and annual throughput less than 12,000 gallons.
- (c) The following equipment related to manufacturing activities not resulting in the emission of HAPs: brazing equipment, cutting torches, soldering equipment, welding equipment.[326 IAC 6-3-2]
- (d) Closed loop heating and cooling systems.
- (f) Activities associated with the treatment of wastewater streams with an oil and grease content less than or equal to one percent (1%) by volume.
- (g) Any operation using aqueous solutions containing less than one percent (1%) by weight of VOCs, excluding HAPs.
- (h) Paved and unpaved roads and parking lots with public access.
- (i) Blowdown for any of the following: sight glass; boiler; compressors; pumps; and cooling tower.
- (j) Stationary fire pumps.
- (k) The following lead sources with potential emissions less than 2.26 pounds per day: Five (5) solder dip pots; two (2) core bake ovens; two (2) hard tube mills; and one (1) core and header cooler.[326 IAC 6-3-2]
- (l) Four (4) Tungsten Inert Gas welding stations with a maximum hourly metal consumption per station of 0.000168 lbs/hr-station.[326 IAC 6-3-2]
- (m) One (1) MIG welding unit, identified as EU25, with a maximum capacity of 1.20 pounds of wire per hour.[326 IAC 6-3-2]
- (n) Nine (9) Metal Inert Gas (MIG) welding stations, identified as EU25, capacity: 3.328 pounds of wire per hour, each.[326 IAC 6-3-2]
- (o) One (1) Core and Header Cooler with a maximum product input capacity of 5,610 pounds per hour.
- (p) One (1) brass/steel cleaning line, identified as EU46, equipped with one (1) alkaline tank, two (2) phosphoric acid tanks, one (1) rust inhibitor, and three (3) rinse tanks, all heated by natural gas combustion units totaling 5.5 million British thermal units per hour.
- (q) One (1) sheet metal dry-off and cooler, identified as EU47.

- (r) Final assembly and seaming operations, identified as EU51.[326 IAC 6-3-2]

A.4 FESOP Applicability [326 IAC 2-8-2]

This stationary source, otherwise required to have a Part 70 permit as described in 326 IAC 2-7-2(a), has applied to the Indiana Department of Environmental Management (IDEM), Office of Air Quality (OAQ) to renew a Federally Enforceable State Operating Permit (FESOP).

A.5 Prior Permits Superseded [326 IAC 2-1.1-9.5]

- (a) All terms and conditions of previous permits issued pursuant to permitting programs approved into the state implementation plan have been either
 - (1) incorporated as originally stated,
 - (2) revised, or
 - (3) deletedby this permit.
- (b) All previous registrations and permits are superseded by this permit.

SECTION B

GENERAL CONDITIONS

B.1 Permit No Defense [IC 13]

Indiana statutes from IC 13 and rules from 326 IAC, quoted in conditions in this permit, are those applicable at the time the permit was issued. The issuance or possession of this permit shall not alone constitute a defense against an alleged violation of any law, regulation or standard, except for the requirement to obtain a FESOP under 326 IAC 2-8.

B.2 Definitions [326 IAC 2-8-1]

Terms in this permit shall have the definition assigned to such terms in the referenced regulation. In the absence of definitions in the referenced regulation, the applicable definitions found in the statutes or regulations (IC 13-11, 326 IAC 1-2, and 326 IAC 2-7) shall prevail.

B.3 Permit Term [326 IAC 2-8-4(2)]

This permit is issued for a fixed term of five (5) years from the original date, as determined in accordance with IC 4-21.5-3-5(f) and IC 13-15-5-3. Subsequent revisions, modifications, or amendments of this permit do not affect the expiration date.

B.4 Enforceability [326 IAC 2-8-6]

(a) Unless otherwise stated, all terms and conditions in this permit, including any provisions designed to limit the source's potential to emit, are enforceable by IDEM, the United States Environmental Protection Agency (U.S. EPA) and by citizens in accordance with the Clean Air Act.

B.5 Termination of Right to Operate [326 IAC 2-8-9] [326 IAC 2-8-3(h)]

The Permittee's right to operate this source terminates with the expiration of this permit unless a timely and complete renewal application is submitted at least nine (9) months prior to the date of expiration of the source's existing permit, consistent with 326 IAC 2-8-3(h) and 326 IAC 2-8-9.

B.6 Severability [326 IAC 2-8-4(4)]

The provisions of this permit are severable; a determination that any portion of this permit is invalid shall not affect the validity of the remainder of the permit.

B.7 Property Rights or Exclusive Privilege [326 IAC 2-8-4(5)(D)]

This permit does not convey any property rights of any sort, or any exclusive privilege.

B.8 Duty to Supplement and Provide Information [326 IAC 2-8-3(f)] [326 IAC 2-8-4(5)(E)] [326 IAC 2-8-5(a)(4)]

(a) The Permittee, upon becoming aware that any relevant facts were omitted or incorrect information was submitted in the permit application, shall promptly submit such supplementary facts or corrected information to:

Indiana Department of Environmental Management
Permits Branch, Office of Air Quality
100 North Senate Avenue, P.O. Box 6015
Indianapolis, Indiana 46206-6015

The submittal by the Permittee does require the certification by the "authorized individual" as defined by 326 IAC 2-1.1-1(1).

(b) The Permittee shall furnish to IDEM, OAQ, within a reasonable time, any information that IDEM, OAQ, may request in writing to determine whether cause exists for modifying, revoking and reissuing, or terminating this permit, or to determine compliance with this permit.

The submittal by the Permittee does require the certification by the "authorized individual" as defined by 326 IAC 2-1.1-1(1). Upon request, the Permittee shall also furnish to IDEM, OAQ, copies of records required to be kept by this permit or, for information claimed to be confidential, the Permittee may furnish such records directly to the U. S. EPA along with a claim of confidentiality.[326 IAC 2-8-4(5)(E)]

- (c) The Permittee may include a claim of confidentiality in accordance with 326 IAC 17.1. When furnishing copies of requested records directly to U. S. EPA, the Permittee may assert a claim of confidentiality in accordance with 40 CFR 2, Subpart B.

B.9 Compliance Order Issuance [326 IAC 2-8-5(b)]

IDEM, OAQ may issue a compliance order to this Permittee upon discovery that this permit is in nonconformance with an applicable requirement. The order may require immediate compliance or contain a schedule for expeditious compliance with the applicable requirement.

B.10 Compliance with Permit Conditions [326 IAC 2-8-4(5)(A)] [326 IAC 2-8-4(5)(B)]

- (a) The Permittee must comply with all conditions of this permit. Noncompliance with any provisions of this permit is grounds for:
 - (1) Enforcement action;
 - (2) Permit termination, revocation and reissuance, or modification; and
 - (3) Denial of a permit renewal application.
- (b) It shall not be a defense for the Permittee in an enforcement action that it would have been necessary to halt or reduce the permitted activity in order to maintain compliance with the conditions of this permit.
- (c) An emergency does constitute an affirmative defense in an enforcement action provided the Permittee complies with the applicable requirements set forth in Section B, Emergency Provisions.

B.11 Certification [326 IAC 2-8-3(d)] [326 IAC 2-8-4(3)(C)(i)] [326 IAC 2-8-5(1)]

- (a) Where specifically designated by this permit or required by an applicable requirement, any application form, report, or compliance certification submitted shall contain certification by an authorized individual of truth, accuracy, and completeness. This certification, shall state that, based on information and belief formed after reasonable inquiry, the statements and information in the document are true, accurate, and complete.
- (b) One (1) certification shall be included, using the attached Certification Form, with each submittal requiring certification.
- (c) An authorized individual is defined at 326 IAC 2-1.1-1(1).

B.12 Annual Compliance Certification [326 IAC 2-8-5(a)(1)]

- (a) The Permittee shall annually submit a compliance certification report which addresses the status of the source's compliance with the terms and conditions contained in this permit, including emission limitations, standards, or work practices. All certifications shall cover the time period from January 1 to December 31 of the previous year, and shall be submitted in letter form no later than July 1 of each year to:

Indiana Department of Environmental Management
Compliance Branch, Office of Air Quality
100 North Senate Avenue, P.O. Box 6015
Indianapolis, Indiana 46206-6015

- (b) The annual compliance certification report required by this permit shall be considered timely if the date postmarked on the envelope or certified mail receipt, or affixed by the shipper on the private shipping receipt, is on or before the date it is due. If the document is submitted by any other means, it shall be considered timely if received by IDEM, OAQ, on or before the date it is due.
- (c) The annual compliance certification report shall include the following:
 - (1) The appropriate identification of each term or condition of this permit that is the basis of the certification;
 - (2) The compliance status;
 - (3) Whether compliance was continuous or intermittent;
 - (4) The methods used for determining the compliance status of the source, currently and over the reporting period consistent with 326 IAC 2-8-4(3); and
 - (5) Such other facts as specified in Sections D of this permit, IDEM, OAQ, may require to determine the compliance status of the source.

The notification which shall be submitted by the Permittee does require the certification by the "authorized individual" as defined by 326 IAC 2-1.1-1(1).

B.13 Preventive Maintenance Plan [326 IAC 1-6-3] [326 IAC 2-8-4(9)] [326 IAC 2-8-5(a)(1)]

- (a) If required by specific condition(s) in Section D of this permit, the Permittee shall maintain and implement Preventive Maintenance Plans (PMPs), including the following information on each facility:
 - (1) Identification of the individual(s) responsible for inspecting, maintaining, and repairing emission control devices;
 - (2) A description of the items or conditions that will be inspected and the inspection schedule for said items or conditions; and
 - (3) Identification and quantification of the replacement parts that will be maintained in inventory for quick replacement.
- (b) The Permittee shall implement the PMPs as necessary to ensure that failure to implement a PMP does not cause or contribute to a violation of any limitation on emissions or potential to emit.
- (c) A copy of the PMPs shall be submitted to IDEM, OAQ, upon request and within a reasonable time, and shall be subject to review and approval by IDEM, OAQ. IDEM, OAQ, may require the Permittee to revise its PMPs whenever lack of proper maintenance causes or contributes to any violation. The PMP does not require the certification by the "authorized individual" as defined by 326 IAC 2-1.1-1(1).

- (d) Records of preventive maintenance shall be retained for a period of at least five (5) years. These records shall be kept at the source location for a minimum of three (3) years. The records may be stored elsewhere for the remaining two (2) years as long as they are available upon request. If the Commissioner makes a request for records to the Permittee, the Permittee shall furnish the records to the Commissioner within a reasonable time.

B.14 Emergency Provisions [326 IAC 2-8-12]

- (a) An emergency, as defined in 326 IAC 2-7-1(12), is not an affirmative defense for an action brought for noncompliance with a federal or state health-based emission limitation, except as provided in 326 IAC 2-8-12.
- (b) An emergency, as defined in 326 IAC 2-7-1(12), constitutes an affirmative defense to an action brought for noncompliance with a health-based or technology-based emission limitation if the affirmative defense of an emergency is demonstrated through properly signed, contemporaneous operating logs or other relevant evidence that describes the following:
 - (1) An emergency occurred and the Permittee can, to the extent possible, identify the causes of the emergency;
 - (2) The permitted facility was at the time being properly operated;
 - (3) During the period of an emergency, the Permittee took all reasonable steps to minimize levels of emissions that exceeded the emission standards or other requirements in this permit;
 - (4) For each emergency lasting one (1) hour or more, the Permittee notified IDEM, OAQ / Northwest Regional Office, within four (4) daytime business hours after the beginning of the emergency, or after the emergency was discovered or reasonably should have been discovered;

Telephone No.: 1-800-451-6027 (ask for Office of Air Quality, Compliance Section)
or,

Telephone No.: 317-233-5674 (ask for Compliance Section)
Facsimile No.: 317-233-5967

Telephone No. of Northwest Regional Office: 888-672-8323 or 219-881-6712
Facsimile No. of Northwest Regional Office: 812-436-2570

Failure to notify IDEM, OAQ / Northwest Regional Office, by telephone or facsimile within four (4) daytime business hours after the beginning of the emergency, or after the emergency is discovered or reasonably should have been discovered, shall constitute a violation of 326 IAC 2-8 and any other applicable rules. [326 IAC 2-8-12(f)]

- (5) For each emergency lasting one (1) hour or more, the Permittee submitted the attached Emergency Occurrence Report Form or its equivalent, either by mail or facsimile to:

Indiana Department of Environmental Management
Compliance Branch, Office of Air Quality
100 North Senate Avenue, P.O. Box 6015
Indianapolis, Indiana 46206-6015

within two (2) working days of the time when emission limitations were exceeded due to the emergency.

The notice fulfills the requirement of 326 IAC 2-8-4(3)(C)(ii) and must contain the following:

- (A) A description of the emergency;
- (B) Any steps taken to mitigate the emissions; and
- (C) Corrective actions taken.

The notification which shall be submitted by the Permittee does not require the certification by the "authorized individual" as defined by 326 IAC 2-1.1-1(1).

- (6) The Permittee immediately took all reasonable steps to correct the emergency.
- (c) In any enforcement proceeding, the Permittee seeking to establish the occurrence of an emergency has the burden of proof.
- (d) This emergency provision supersedes 326 IAC 1-6 (Malfunctions). This permit condition is in addition to any emergency or upset provision contained in any applicable requirement.
- (e) IDEM, OAQ, may require that the Preventive Maintenance Plans required under 326 IAC 2-8-3(c)(6) be revised in response to an emergency.
- (f) Failure to notify IDEM, OAQ, by telephone or facsimile of an emergency lasting more than one (1) hour in accordance with (b)(4) and (5) of this condition shall constitute a violation of 326 IAC 2-8 and any other applicable rules.
- (g) Operations may continue during an emergency only if the following conditions are met:
 - (1) If the emergency situation causes a deviation from a technology-based limit, the Permittee may continue to operate the affected emitting facilities during the emergency provided the Permittee immediately takes all reasonable steps to correct the emergency and minimize emissions.
 - (2) If an emergency situation causes a deviation from a health-based limit, the Permittee may not continue to operate the affected emissions facilities unless:
 - (A) The Permittee immediately takes all reasonable steps to correct the emergency situation and to minimize emissions; and
 - (B) Continued operation of the facilities is necessary to prevent imminent injury to persons, severe damage to equipment, substantial loss of capital investment, or loss of product or raw material of substantial economic value.

Any operations shall continue no longer than the minimum time required to prevent the situations identified in (g)(2)(B) of this condition.

B.15 Deviations from Permit Requirements and Conditions [326 IAC 2-8-4(3)(C)(ii)]

- (a) Deviations from any permit requirements (for emergencies see Section B - Emergency Provisions), the probable cause of such deviations, and any response steps or preventive measures taken shall be reported to:

Indiana Department of Environmental Management
Compliance Data Section, Office of Air Quality
100 North Senate Avenue, P.O. Box 6015
Indianapolis, Indiana 46206-6015

using the attached Quarterly Deviation and Compliance Monitoring Report, or its equivalent. A deviation required to be reported pursuant to an applicable requirement that exists independent of this permit, shall be reported according to the schedule stated in the applicable requirement and does not need to be included in this report.

The Quarterly Deviation and Compliance Monitoring Report does require the certification by the "authorized individual" as defined by 326 IAC 2-1.1-1(1).

- (b) A deviation is an exceedance of a permit limitation or a failure to comply with a requirement of the permit.
- (c) Emergencies shall be included in the Quarterly Deviation and Compliance Monitoring Report.

B.16 Permit Modification, Reopening, Revocation and Reissuance, or Termination [326 IAC 2-8-4(5)(C)] [326 IAC 2-8-7(a)] [326 IAC 2-8-8]

- (a) This permit may be modified, reopened, revoked and reissued, or terminated for cause. The filing of a request by the Permittee for a FESOP modification, revocation and reissuance, or termination, or of a notification of planned changes or anticipated noncompliance does not stay any condition of this permit. [326 IAC 2-8-4(5)(C)] The notification by the Permittee does require the certification by the "authorized individual" as defined by 326 IAC 2-1.1-1(1).
- (b) This permit shall be reopened and revised under any of the circumstances listed in IC 13-15-7-2 or if IDEM, OAQ determines any of the following:
 - (1) That this permit contains a material mistake.
 - (2) That inaccurate statements were made in establishing the emissions standards or other terms or conditions.
 - (3) That this permit must be revised or revoked to assure compliance with an applicable requirement. [326 IAC 2-8-8(a)]
- (c) Proceedings by IDEM, OAQ, to reopen and revise this permit shall follow the same procedures as apply to initial permit issuance and shall affect only those parts of this permit for which cause to reopen exists. Such reopening and revision shall be made as expeditiously as practicable. [326 IAC 2-8-8(b)]
- (d) The reopening and revision of this permit, under 326 IAC 2-8-8(a), shall not be initiated before notice of such intent is provided to the Permittee by IDEM, OAQ, at least thirty (30) days in advance of the date this permit is to be reopened, except that IDEM, OAQ, may provide a shorter time period in the case of an emergency. [326 IAC 2-8-8(c)]

B.17 Permit Renewal [326 IAC 2-8-3(h)]

- (a) The application for renewal shall be submitted using the application form or forms prescribed by IDEM, OAQ, and shall include the information specified in 326 IAC 2-8-3. Such information shall be included in the application for each emission unit at this source, except those emission units included on the trivial or insignificant activities list contained in 326 IAC 2-7-1(21) and 326 IAC 2-7-1(40). The renewal application does require the certification by the "authorized individual" as defined by 326 IAC 2-1.1-1(1).

Request for renewal shall be submitted to:

Indiana Department of Environmental Management
Permits Branch, Office of Air Quality
100 North Senate Avenue, P.O. Box 6015
Indianapolis, IN 46206-6015

(b) Timely Submittal of Permit Renewal [326 IAC 2-8-3]

(1) A timely renewal application is one that is:

(A) Submitted at least nine (9) months prior to the date of the expiration of this permit; and

(B) If the date postmarked on the envelope or certified mail receipt, or affixed by the shipper on the private shipping receipt, is on or before the date it is due. If the document is submitted by any other means, it shall be considered timely if received by IDEM, OAQ, on or before the date it is due.

(2) If IDEM, OAQ, upon receiving a timely and complete permit application, fails to issue or deny the permit renewal prior to the expiration date of this permit, this existing permit shall not expire and all terms and conditions shall continue in effect until the renewal permit has been issued or denied.

(c) Right to Operate After Application for Renewal [326 IAC 2-8-9]

If the Permittee submits a timely and complete application for renewal of this permit, the source's failure to have a permit is not a violation of 326 IAC 2-8 until IDEM, OAQ, takes final action on the renewal application, except that this protection shall cease to apply if, subsequent to the completeness determination, the Permittee fails to submit by the deadline specified in writing by IDEM, OAQ, any additional information identified as needed to process the application.

B.18 Permit Amendment or Revision [326 IAC 2-8-10] [326 IAC 2-8-11.1]

(a) Permit amendments and revisions are governed by the requirements of 326 IAC 2-8-10 or 326 IAC 2-8-11.1 whenever the Permittee seeks to amend or modify this permit.

(b) Any application requesting an amendment or modification of this permit shall be submitted to:

Indiana Department of Environmental Management
Permits Branch, Office of Air Quality
100 North Senate Avenue, P.O. Box 6015
Indianapolis, Indiana 46206-6015

Any such application should be certified by the "authorized individual" as defined by 326 IAC 2-1.1-1(1).

(c) The Permittee may implement the administrative amendment changes addressed in the request for an administrative amendment immediately upon submittal of the request. [326 IAC 2-8-10(b)(3)]

B.19 Operational Flexibility [326 IAC 2-8-15]

(a) The Permittee may make any change or changes at this source that are described in 326 IAC 2-8-15(b) through (d), without prior permit revision, if each of the following conditions

is met:

- (1) The changes are not modifications under any provision of Title I of the Clean Air Act;
- (2) Any approval required by 326 IAC 2-8-11.1 has been obtained;
- (3) The changes do not result in emissions which exceed the emissions allowable under this permit (whether expressed herein as a rate of emissions or in terms of total emissions);
- (4) The Permittee notifies the:

Indiana Department of Environmental Management
Permits Branch, Office of Air Quality
100 North Senate Avenue, P.O. Box 6015
Indianapolis, Indiana 46206-6015

and

United States Environmental Protection Agency, Region V
Air and Radiation Division, Regulation Development Branch - Indiana (AR-18J)
77 West Jackson Boulevard
Chicago, Illinois 60604-3590

in advance of the change by written notification at least ten (10) days in advance of the proposed change. The Permittee shall attach every such notice to the Permittee's copy of this permit; and

- (5) The Permittee maintains records on-site which document, on a rolling five (5) year basis, all such changes and emissions trading that are subject to 326 IAC 2-8-15(b) through (d) and makes such records available, upon reasonable request, to public review.

Such records shall consist of all information required to be submitted to IDEM, OAQ, in the notices specified in 326 IAC 2-8-15(b), (c)(1), and (d).

- (b) The Permittee may make Section 502(b)(10) of the Clean Air Act changes (this term is defined at 326 IAC 2-7-1(36)) without a permit revision, subject to the constraint of 326 IAC 2-8-15(a) and the following additional conditions:

- (1) A brief description of the change within the source;
- (2) The date on which the change will occur;
- (3) Any change in emissions; and
- (4) Any permit term or condition that is no longer applicable as a result of the change.

The notification which shall be submitted by the Permittee does not require the certification by the "authorized individual" as defined by 326 IAC 2-1.1-1.

- (c) Emission Trades [326 IAC 2-8-15(c)]
The Permittee may trade increases and decreases in emissions in the source, where the

applicable SIP provides for such emission trades without requiring a permit revision, subject to the constraints of Section (a) of this condition and those in 326 IAC 2-8-15(c).

- (d) Alternative Operating Scenarios [326 IAC 2-8-15(d)]
The Permittee may make changes at the source within the range of alternative operating scenarios that are described in the terms and conditions of this permit in accordance with 326 IAC 2-8-4(7). No prior notification of IDEM, OAQ or U.S. EPA is required.

B.20 Permit Revision Requirement [326 IAC 2-8-11.1]

A modification, construction, or reconstruction is governed by the requirements of 326 IAC 2 and 326 IAC 2-8-11.1.

B.21 Inspection and Entry [326 IAC 2-8-5(a)(2)] [IC 13-14-2-2]

Upon presentation of proper identification cards, credentials, and other documents as may be required by law, and subject to the Permittee's right under all applicable laws and regulations to assert that the information collected by the agency is confidential and entitled to be treated as such, the Permittee shall allow IDEM, OAQ, U.S. EPA, or an authorized representative to perform the following:

- (a) Enter upon the Permittee's premises where a FESOP source is located, or emissions related activity is conducted, or where records must be kept under the conditions of this permit;
- (b) Have access to and copy, at reasonable times, any records that must be kept under the conditions of this permit;
- (c) Inspect, at reasonable times, any facilities, equipment (including monitoring and air pollution control equipment), practices, or operations regulated or required under this permit;
- (d) Sample or monitor, at reasonable times, substances or parameters for the purpose of assuring compliance with this permit or applicable requirements; and
- (e) Utilize any photographic, recording, testing, monitoring, or other equipment for the purpose of assuring compliance with this permit or applicable requirements.

B.22 Transfer of Ownership or Operational Control [326 IAC 2-8-10]

- (a) The Permittee must comply with the requirements of 326 IAC 2-8-10 whenever the Permittee seeks to change the ownership or operational control of the source and no other change in the permit is necessary.
- (b) Any application requesting a change in the ownership or operational control of the source shall contain a written agreement containing a specific date for transfer of permit responsibility, coverage and liability between the current and new Permittee. The application shall be submitted to:

Indiana Department of Environmental Management
Permits Branch, Office of Air Quality
100 North Senate Avenue, P.O. Box 6015
Indianapolis, Indiana 46206-6015

The application which shall be submitted by the Permittee does require the certification by the "authorized individual" as defined by 326 IAC 2-1.1-1(1).

- (c) The Permittee may implement administrative amendment changes addressed in the

request for an administrative amendment immediately upon submittal of the request. [326 IAC 2-8-11(b)(3)]

B.23 Annual Fee Payment [326 IAC 2-7-19] [326 IAC 2-8-4(6)] [326 IAC 2-8-16]

- (a) The Permittee shall pay annual fees to IDEM, OAQ, within thirty (30) calendar days of receipt of a billing. Pursuant to 326 IAC 2-7-19(b), if the Permittee does not receive a bill from IDEM, OAQ the applicable fee is due April 1 of each year.
- (b) Failure to pay may result in administrative enforcement action, or revocation of this permit.
- (c) The Permittee may call the following telephone numbers: 1-800-451-6027 or 317-233-0425 (ask for OAQ, Technical Support and Modeling Section), to determine the appropriate permit fee.

SECTION C

SOURCE OPERATION CONDITIONS

Entire Source

Emissions Limitations and Standards [326 IAC 2-8-4(1)]

C.1 Overall Source Limit [326 IAC 2-8][326 IAC 2-2]

The purpose of this permit is to limit this source's potential to emit to less than major source levels for the purpose of Section 502(a) of the Clean Air Act.

(a) Pursuant to 326 IAC 2-8:

- (1) The potential to emit any regulated pollutant, except particulate matter (PM), from the entire source shall be limited to less than one-hundred (100) tons per twelve (12) consecutive month period.
- (2) The potential to emit any individual hazardous air pollutant (HAP) from the entire source shall be limited to less than ten (10) tons per twelve (12) consecutive month period; and
- (3) The potential to emit any combination of HAPs from the entire source shall be limited to less than twenty-five (25) tons per twelve (12) consecutive month period.

(b) Any change or modification that increases the potential to emit VOC, SO₂, NO_x, CO, PM₁₀ or PM to 250 tons per year or more shall cause this source to become a major source pursuant to 326 IAC 2-2, PSD, and shall require prior OAQ approval.

(c) This condition shall include all emission points at this source including those that are insignificant as defined in 326 IAC 2-7-1(21). The source shall be allowed to add insignificant activities not already listed in this permit, provided that the source's potential to emit does not exceed the above specified limits.

(d) Section D of this permit contains independently enforceable provisions to satisfy this requirement.

C.2 Opacity [326 IAC 5-1]

Pursuant to 326 IAC 5-1-2 (Opacity Limitations), except as provided in 326 IAC 5-1-3 (Temporary Alternative Opacity Limitations), opacity shall meet the following, unless otherwise stated in this permit:

- (a) Opacity shall not exceed an average of forty percent (40%) in any one (1) six (6) minute averaging period as determined in 326 IAC 5-1-4.
- (b) Opacity shall not exceed sixty percent (60%) for more than a cumulative total of fifteen (15) minutes (sixty (60) readings as measured according to 40 CFR 60, Appendix A, Method 9 or fifteen (15) one (1) minute nonoverlapping integrated averages for a continuous opacity monitor) in a six (6) hour period.

C.3 Open Burning [326 IAC 4-1] [IC 13-17-9]

The Permittee shall not open burn any material except as provided in 326 IAC 4-1-3, 326 IAC 4-1-4 or 326 IAC 4-1-6. The previous sentence notwithstanding, the Permittee may open burn in accordance with an open burning approval issued by the Commissioner under 326 IAC 4-1-4.1.

C.4 Incineration [326 IAC 4-2] [326 IAC 9-1-2(3)]

The Permittee shall not operate an incinerator or incinerate any waste or refuse except as provided in 326 IAC 4-2 and in 326 IAC 9-1-2.

C.5 Fugitive Dust Emissions [326 IAC 6-4]

The Permittee shall not allow fugitive dust to escape beyond the property line or boundaries of the property, right-of-way, or easement on which the source is located, in a manner that would violate 326 IAC 6-4 (Fugitive Dust Emissions).

C.6 Operation of Equipment [326 IAC 2-8-5(a)(4)]

Except as otherwise provided by statute, rule or in this permit, all air pollution control equipment listed in this permit and used to comply with an applicable requirement shall be operated at all times that the emission units vented to the control equipment are in operation.

C.7 Stack Height [326 IAC 1-7]

The Permittee shall comply with the applicable provisions of 326 IAC 1-7 (Stack Height Provisions), for all exhaust stacks through which a potential (before controls) of twenty-five (25) tons per year or more of particulate matter or sulfur dioxide is emitted.

C.8 Asbestos Abatement Projects [326 IAC 14-10] [326 IAC 18] [40 CFR 61, Subpart M]

(a) Notification requirements apply to each owner or operator. If the combined amount of regulated asbestos containing material (RACM) to be stripped, removed or disturbed is at least 260 linear feet on pipes or 160 square feet on other facility components, or at least thirty-five (35) cubic feet on all facility components, then the notification requirements of 326 IAC 14-10-3 are mandatory. All demolition projects require notification whether or not asbestos is present.

(b) The Permittee shall ensure that a written notification is sent on a form provided by the Commissioner at least ten (10) working days before asbestos stripping or removal work or before demolition begins, per 326 IAC 14-10-3, and shall update such notice as necessary, including, but not limited to the following:

(1) When the amount of affected asbestos containing material increases or decreases by at least twenty percent (20%); or

(2) If there is a change in the following:

(A) Asbestos removal or demolition start date;

(B) Removal or demolition contractor; or

(C) Waste disposal site.

(c) The Permittee shall ensure that the notice is postmarked or delivered according to the guidelines set forth in 326 IAC 14-10-3(2).

(d) The notice to be submitted shall include the information enumerated in 326 IAC 14-10-3(3).

All required notifications shall be submitted to:

Indiana Department of Environmental Management
Asbestos Section, Office of Air Quality
100 North Senate Avenue, P.O. Box 6015
Indianapolis, Indiana 46206-6015

The notice shall include a signed certification from the owner or operator that the information provided in this notification is correct and that only Indiana licensed workers and project supervisors will be used to implement the asbestos removal project. The notifications do not require a certification by the "authorized individual" as defined by 326 IAC 2-1.1-1(1).

- (e) **Procedures for Asbestos Emission Control**
The Permittee shall comply with the applicable emission control procedures in 326 IAC 14-10-4 and 40 CFR 61.145(c). Per 326 IAC 14-10-4 emission control requirements are applicable for any removal or disturbance of RACM greater than three (3) linear feet on pipes or three (3) square feet on any other facility components or a total of at least 0.75 cubic feet on all facility components.
- (f) **Indiana Accredited Asbestos Inspector**
The Permittee shall comply with 326 IAC 14-10-1(a) that requires the owner or operator, prior to a renovation/demolition, to use an Indiana Accredited Asbestos Inspector to thoroughly inspect the affected portion of the facility for the presence of asbestos. The requirement that the inspector be accredited is federally enforceable.

Testing Requirements [326 IAC 2-8-4(3)]

C.9 Performance Testing [326 IAC 3-6]

- (a) All testing shall be performed according to the provisions of 326 IAC 3-6 (Source Sampling Procedures), except as provided elsewhere in this permit, utilizing any applicable procedures and analysis methods specified in 40 CFR 51, 40 CFR 60, 40 CFR 61, 40 CFR 63, 40 CFR 75, or other procedures approved by IDEM, OAQ.

A test protocol, except as provided elsewhere in this permit, shall be submitted to:

Indiana Department of Environmental Management
Compliance Data Section, Office of Air Quality
100 North Senate Avenue, P. O. Box 6015
Indianapolis, Indiana 46206-6015

no later than thirty-five (35) days prior to the intended test date. The protocol submitted by the Permittee does not require certification by the "authorized individual" as defined by 326 IAC 2-1.1-1(1).

- (b) The Permittee shall notify IDEM, OAQ of the actual test date at least fourteen (14) days prior to the actual test date. The notification submitted by the Permittee does not require certification by the "authorized individual" as defined by 326 IAC 2-1.1-1(1).
- (c) Pursuant to 326 IAC 3-6-4(b), all test reports must be received by IDEM, OAQ, not later than forty-five (45) days after the completion of the testing. An extension may be granted by IDEM, OAQ, if the source submits to IDEM, OAQ, a reasonable written explanation not later than five (5) days prior to the end of the initial forty-five (45) day period.

Compliance Requirements [326 IAC 2-1.1-11]

C.10 Compliance Requirements [326 IAC 2-1.1-11]

The commissioner may require stack testing, monitoring, or reporting at any time to assure compliance with all applicable requirements. Any monitoring or testing shall be performed in accordance with 326 IAC 3 or other methods approved by the commissioner or the U. S. EPA.

Compliance Monitoring Requirements [326 IAC 2-8-4] [326 IAC 2-8-5(a)(1)]

C.11 Compliance Monitoring [326 IAC 2-8-4(3)] [326 IAC 2-8-5(a)(1)]

Unless otherwise specified in this permit, all monitoring and record keeping requirements not already legally required shall be implemented upon issuance of this permit. If required by Section D, the Permittee shall be responsible for installing any necessary equipment and initiating any required monitoring related to that equipment.

Unless otherwise specified in the approval for the new emissions unit, compliance monitoring for new emission units or emission units added through a permit revision shall be implemented when operation begins.

C.12 Monitoring Methods [326 IAC 3] [40 CFR 60] [40 CFR 63]

Any monitoring or testing performed required by Section D of this permit shall be performed according to the provisions of 326 IAC 3, 40 CFR 60, Appendix A, 40 CFR 60 Appendix B, 40 CFR 63 or other approved methods as specified in this permit.

Corrective Actions and Response Steps [326 IAC 2-8-4] [326 IAC 2-8-5(a)(1)]

C.13 Risk Management Plan [326 IAC 2-8-4] [40 CFR 68.215]

If a regulated substance, subject to 40 CFR 68, is present at a source in more than a threshold quantity, 40 CFR 68 is an applicable requirement and the Permittee shall submit:

- (a) A compliance schedule for meeting the requirements of 40 CFR 68; or
- (b) As a part of the annual compliance certification submitted under 326 IAC 2-7-6(5), a certification statement that the source is in compliance with all the requirements of 40 CFR 68, including the registration and submission of a Risk Management Plan (RMP).

All documents submitted pursuant to this condition shall include the certification by the "authorized individual" as defined by 326 IAC 2-1.1-1(1).

C.14 Compliance Response Plan - Preparation, Implementation, Records, and Reports [326 IAC 2-8-4] [326 IAC 2-8-5]

(a) The Permittee is required to prepare a Compliance Response Plan (CRP) for each compliance monitoring condition of this permit. A CRP shall be submitted to IDEM, OAQ, upon request. The CRP shall be prepared within ninety (90) days after issuance of this permit by the Permittee, supplemented from time to time by the Permittee, maintained on site, and comprised of:

- (1) Reasonable response steps that may be implemented in the event that a response step is needed pursuant to the requirements of Section D of this permit; and an expected timeframe for taking reasonable response steps.
- (2) If, at any time, the Permittee takes reasonable response steps that are not set forth in the Permittee's current Compliance Response Plan and the Permittee documents such response in accordance with subsection (e) below, the Permittee

shall amend its Compliance Response Plan to include such response steps taken.

- (b) For each compliance monitoring condition of this permit, reasonable response steps shall be taken when indicated by the provisions of that compliance monitoring condition as follows:
 - (1) Reasonable response steps shall be taken as set forth in the Permittee's current Compliance Response Plan; or
 - (2) If none of the reasonable response steps listed in the Compliance Response Plan is applicable or responsive to the excursion, the Permittee shall devise and implement additional response steps as expeditiously as practical. Taking such additional response steps shall not be considered a deviation from this permit so long as the Permittee documents such response steps in accordance with this condition.
 - (3) If the Permittee determines that additional response steps would necessitate that the emissions unit or control device be shut down, the IDEM, OAQ shall be promptly notified of the expected date of the shut down, the status of the applicable compliance monitoring parameter with respect to normal, and the results of the actions taken up to the time of notification.
 - (4) Failure to take reasonable response steps shall constitute a violation of the permit.
- (c) The Permittee is not required to take any further response steps for any of the following reasons:
 - (1) A false reading occurs due to the malfunction of the monitoring equipment and prompt action was taken to correct the monitoring equipment.
 - (2) The Permittee has determined that the compliance monitoring parameters established in the permit conditions are technically inappropriate, has previously submitted a request for an administrative amendment to the permit, and such request has not been denied.
 - (3) An automatic measurement was taken when the process was not operating.
 - (4) The process has already returned or is returning to operating within "normal" parameters and no response steps are required.
- (d) When implementing reasonable steps in response to a compliance monitoring condition, if the Permittee determines that an exceedance of an emission limitation has occurred, the Permittee shall report such deviations pursuant to Section B-Deviations from Permit Requirements and Conditions.
- (e) The Permittee shall record all instances when response steps are taken. In the event of an emergency, the provisions of 326 IAC 2-7-16 (Emergency Provisions) requiring prompt corrective action to mitigate emissions shall prevail.
- (f) Except as otherwise provided by a rule or provided specifically in Section D, all monitoring as required in Section D shall be performed when the emission unit is operating, except for time necessary to perform quality assurance and maintenance activities.

C.15 Actions Related to Noncompliance Demonstrated by a Stack Test [326 IAC 2-8-4] [326 IAC 2-8-5]

- (a) When the results of a stack test performed in conformance with Section C - Performance Testing, of this permit exceed the level specified in any condition of this permit, the

Permittee shall take appropriate response actions. The Permittee shall submit a description of these response actions to IDEM, OAQ, within thirty (30) days of receipt of the test results. The Permittee shall take appropriate action to minimize excess emissions from the affected facility while the response actions are being implemented.

- (b) A retest to demonstrate compliance shall be performed within one hundred twenty (120) days of receipt of the original test results. Should the Permittee demonstrate to IDEM, OAQ that retesting in one-hundred and twenty (120) days is not practicable, IDEM, OAQ may extend the retesting deadline.
- (c) IDEM, OAQ reserves the authority to take any actions allowed under law in response to noncompliant stack tests.

The documents submitted pursuant to this condition do require the certification by the "authorized individual" as defined by 326 IAC 2-1.1-1(1).

Record Keeping and Reporting Requirements [326 IAC 2-8-4(3)]

C.16 General Record Keeping Requirements [326 IAC 2-8-4(3)] [326 IAC 2-8-5]

- (a) Records of all required data, reports and support information shall be retained for a period of at least five (5) years from the date of monitoring sample, measurement, report, or application. These records shall be kept at the source location for a minimum of three (3) years. The records may be stored elsewhere for the remaining two (2) years as long as they are available upon request. If the Commissioner makes a request for records to the Permittee, the Permittee shall furnish the records to the Commissioner within a reasonable time.
- (b) Unless otherwise specified in this permit, all record keeping requirements not already legally required shall be implemented within ninety (90) days of permit issuance.

C.17 General Reporting Requirements [326 IAC 2-8-4(3)(C)] [326 IAC 2-1.1-11]

- (a) The source shall submit the attached Quarterly Deviation and Compliance Monitoring Report or its equivalent. Any deviation from permit requirements, the date(s) of each deviation, the cause of the deviation, and the response steps taken must be reported. This report shall be submitted within thirty (30) days of the end of the reporting period. The Quarterly Deviation and Compliance Monitoring Report shall include the certification by the "authorized individual" as defined by 326 IAC 2-1.1-1(1).
- (b) The report required in (a) of this condition and reports required by conditions in Section D of this permit shall be submitted to:

Indiana Department of Environmental Management
Compliance Data Section, Office of Air Quality
100 North Senate Avenue, P. O. Box 6015
Indianapolis, Indiana 46206-6015
- (c) Unless otherwise specified in this permit, any notice, report, or other submission required by this permit shall be considered timely if the date postmarked on the envelope or certified mail receipt, or affixed by the shipper on the private shipping receipt, is on or before the date it is due. If the document is submitted by any other means, it shall be considered timely if received by IDEM, OAQ, on or before the date it is due.
- (d) Unless otherwise specified in this permit, any quarterly report required in Section D of this permit shall be submitted within thirty (30) days of the end of the reporting period. The report does require the certification by the "authorized individual" as defined by 326 IAC 2-

1.1-1(1).

- (e) Reporting periods are based on calendar years.

Stratospheric Ozone Protection

C.18 Compliance with 40 CFR 82 and 326 IAC 22-1

Pursuant to 40 CFR 82 (Protection of Stratospheric Ozone), Subpart F, except as provided for motor vehicle air conditioners in Subpart B, the Permittee shall comply with the standards for recycling and emissions reduction:

- (a) Persons opening appliances for maintenance, service, repair or disposal must comply with the required practices pursuant to 40 CFR 82.156
- (b) Equipment used during the maintenance, service, repair or disposal of appliances must comply with the standards for recycling and recovery equipment pursuant to 40 CFR 82.158.
- (c) Persons performing maintenance, service, repair or disposal of appliances must be certified by an approved technician certification program pursuant to 40 CFR 82.161.

SECTION D.1

FACILITY OPERATION CONDITIONS

Facility Description [326 IAC 2-8-4(10)]:

- (a) One (1) paint booth, known as the Core and Header Paint Booth (EU8), equipped with air atomization spray guns and dry filters for air pollution control and exhausting to stack 11, capacity 15.0 metal parts per hour.
- (b) One (1) paint booth, known as the Sheet Metal Paint Booth (EU11), equipped with air atomization spray guns and dry filters for air pollution control and exhausting to stacks 14 and 15, capacity 30.0 metal parts per hour.
- (c) One (1) paint booth, known as the Bolted Paint Booth (EU35), equipped with air atomization spray guns and dry filters for air pollution control and exhausting to stack 50, capacity 15.0 metal parts per hour.

(The information describing the process contained in this facility description box is descriptive information and does not constitute enforceable conditions.)

Emission Limitations and Standards [326 IAC 2-8-4(1)]

D.1.1 Volatile Organic Compounds (VOC) [326 IAC 2-8-4]

- (a) The total volatile organic compound (VOC) delivered to the coating applicators at the three (3) paint booths, identified as EU8, EU11 and EU35, shall not exceed a total of 97.7 tons per each twelve (12) consecutive month period. This will limit the VOC emissions from the entire source, to less than one hundred (100) tons per year. Therefore, the requirements of 326 IAC 2-7 do not apply.
- (b) Condition D.1.1(a) from FESOP 091-5035-00025 issued on December 11, 1996, which states that the volatile organic compound (VOC) emissions from the three (3) paint booths (EU8, EU11, and EU35) shall not exceed 90.75 tons per 12 month total rolled on a monthly basis is not applicable because the VOC delivered to the applicators is limited by Condition D.1.1(a) of this FESOP to no more than 97.7 tons per year. This was determined by subtracting the potential to emit VOC from the total of all insignificant activities from 100 tons per year, and truncating the result so that the total is less than 100 tons per year. In FESOP 091-5035-00025, issued on December 11, 1996, the total annual allowable of 100 tons per year was reduced by one-twelfth (1/12) to insure that the source total will not exceed 100 tons per year, including insignificant activities. It has been determined that this source can emit up to 97.7 tons of VOC per year at the total of the three (3) paint booths and the total source potential to emit VOC will be less than 100 tons per year. Therefore, the limit is changed in this FESOP, and Condition D.1.1(a) of FESOP 091-5035-00025 is hereby rescinded.

D.1.2 Hazardous Air Pollutants (HAPs) Limitations [326 IAC 2-8-4]

- (a) The worst case single HAP delivered to the coating applicators at the three (3) paint booths, identified as EU8, EU11 and EU35, shall not exceed 9.58 tons per each twelve (12) consecutive month period, total. Therefore, the requirements of 326 IAC 2-7 do not apply.
- (b) The combination of HAPs delivered to the coating applicators in the three (3) paint booths, identified as EU8, EU11 and EU35, shall not exceed a total of twenty-four (24.0) tons per each twelve (12) consecutive month period. Therefore, the requirements of 326 IAC 2-7 do not apply.

- (c) Condition D.1.2 from FESOP 091-5035-00025 issued on December 11, 1996, which states that the hazardous air pollutant emissions shall be limited as follows: The amount of any single hazardous air pollutant (HAP) delivered to the applicators shall not exceed 8.25 tons per 12 month total rolled on a monthly basis; The amount of any combination of HAPs delivered to the applicators shall not exceed 22.0 tons per 12 month total rolled on a monthly basis, is not applicable because the HAP delivered to the applicators is limited by Conditions D.1.2 (a) and (b) of this FESOP to no more than 9.58 tons per consecutive twelve (12) month period of each individual HAP and 24.0 tons per consecutive twelve (12) month period of any combination of HAPs. This was determined by subtracting the potential to emit each individual HAP and the potential to emit total HAPs from the total of all insignificant activities from 10 and 25 tons per year, respectively, and truncating the results so that the totals are less than 10 and 25 tons per year. In FESOP 091-5035-00025, issued on December 11, 1996, the total annual allowables of 10 and 25 tons per year were reduced by one-twelfth (1/12) to insure that the source total will not exceed 10 tons of each individual HAP and 25 tons of total HAPs per year, including insignificant activities. It has been determined that this source can emit up to 9.58 tons of each individual HAP and 24.0 tons of any combination of HAPs per consecutive twelve (12) month period at the total of the three (3) paint booths and the total source potential to emit VOC will be less than 10 tons of each individual HAP and 25 tons of any combination of HAPs per year. Therefore, the limit is changed in this FESOP, and Condition D.1.2 of FESOP 091-5035-00025 is hereby rescinded.

D.1.3 Volatile Organic Compounds (VOC) [326 IAC 8-2-9]

- (a) Pursuant to 326 IAC 8-2-9 (Miscellaneous Metal Coating Operations), no owner or operator of the three (3) paint booths, identified as EU8, EU11 and EU35, used for coating of miscellaneous metal parts or products may cause, allow, or permit the discharge into the atmosphere of any volatile organic compounds in excess of 3.5 pounds of VOC per gallon of coating excluding water.
- (b) Pursuant to 326 IAC 8-2-9 (Miscellaneous Metal Coating Operations), solvent sprayed from the application equipment during clean up or color changes shall be directed into containers. Such containers shall be closed as soon as such solvent spraying is complete, and the waste solvent shall be disposed of in such a manner that evaporation is minimized.

D.1.4 Particulate Matter (PM and PM₁₀) [326 IAC 2-2] [40 CFR 52.21][326 IAC 2-8-4]

- (a) The solids delivered to the applicators at the three (3) paint booths (EU8, EU11 and EU35) shall not exceed 10,755 tons per each consecutive twelve (12) month period, based on a ten percent (10%) transfer efficiency and a ninety-nine percent (99%) control efficiency, which is equivalent to a potential to emit PM₁₀ from the three (3) paint booths (EU8, EU11 and EU35) of no more than 96.8 tons per year and the potential to emit PM₁₀ from the total of all facilities at this source of less than 100 tons per year. Therefore, the requirements of 326 IAC 2-7 are not applicable. As a result of this PM₁₀ limit, and since PM is equal to PM₁₀ at the three (3) paint booths, the PM emissions from the entire source will be limited to 98.2 tons per year, and the requirements of 326 IAC 2-2, Prevention of Significant Deterioration, are also not applicable.
- (b) Condition D.1.3 from FESOP 091-5035-00025 issued on December 11, 1996, which states that the particulate matter (PM₁₀) emissions from the three (3) paint booths (EU8, EU11, and EU35) shall be limited to 22.6 pounds per hour, is not applicable because that limit did not take PM₁₀ emissions from insignificant activities into account. In Condition D.1.4(a) of this FESOP, the potential to emit PM₁₀ from the three (3) paint booths is limited to no more than 96.8 tons per consecutive twelve (12) month period. This was determined by subtracting the potential to emit PM₁₀ from the total of all insignificant activities from 100 tons per year, and truncating the result so that the total is less than 100 tons per year. Since the PM₁₀

emissions from this source are based on the operation of the dry filters, transfer efficiency of the applicators and the types and amounts of materials used, no hourly emission limit is required to show compliance with 326 IAC 2-8, FESOP. Therefore, the limit is changed in this FESOP, and Condition D.1.3 of FESOP 091-5035-00025 is hereby rescinded.

D.1.5 Particulate Matter (PM) [326 IAC 6-3-2]

Pursuant to 326 IAC 6-3-2, the PM from the three (3) paint booths, identified as EU8, EU11 and EU35, shall not exceed the pound per hour emission rate established as E in the following formula:

Interpolation of the data for the process weight rate up to sixty thousand (60,000) pounds per hour shall be accomplished by use of the equation:

$$E = 4.10 P^{0.67} \quad \text{where } E = \text{rate of emission in pounds per hour; and} \\ P = \text{process weight rate in tons per hour}$$

D.1.6 Preventive Maintenance Plan [326 IAC 2-8-4(9)]

A Preventive Maintenance Plan, in accordance with Section B - Preventive Maintenance Plan, of this permit, is required for these facilities and any control devices.

Compliance Determination Requirements

D.1.7 Volatile Organic Compounds (VOC)

Compliance with the VOC content and usage limitations contained in Conditions D.1.1 and D.1.3 shall be determined pursuant to 326 IAC 8-1-4(a)(3) and 326 IAC 8-1-2(a) using formulation data supplied by the coating manufacturer.

D.1.8 VOC Emissions

Compliance with Condition D.1.1 shall be demonstrated within 30 days of the end of each month based on the total volatile organic compound usage for the most recent twelve (12) month period.

D.1.9 Hazardous Air Pollutants (HAPs)

Compliance with the HAPs usage limitations contained in Condition D.1.2 shall be determined pursuant to 326 IAC 8-1-4(a)(3) and 326 IAC 8-1-2(a) using formulation data supplied by the coating manufacturer.

D.1.10 Hazardous Air Pollutants (HAPs) Emissions

Compliance with Condition D.1.2 shall be demonstrated within 30 days of the end of each month based on the total single and combination of HAPs usage for the most recent twelve (12) month period.

D.1.11 Particulate Matter (PM and PM₁₀)

- (a) In order to comply with Conditions D.1.4 and D.1.5, the dry filters for PM and PM₁₀ control shall be in operation at all times when the one (1) paint booth, identified as EU8, is in operation.
- (b) In order to comply with Conditions D.1.4 and D.1.5, the dry filters for PM and PM₁₀ control shall be in operation at all times when the one (1) paint booth, identified as EU11, is in operation.
- (C) In order to comply with Conditions D.1.4 and D.1.5, the dry filters for PM and PM₁₀ control shall be in operation at all times when the one (1) paint booth, identified as EU35, is in operation.

Compliance Monitoring Requirements [326 IAC 2-8-4] [326 IAC 2-8-5(a)(1)]

D.1.12 Monitoring

- (a) Daily inspections shall be performed to verify the placement, integrity and particle loading of the filters. To monitor the performance of the dry filters, weekly observations shall be made of the overspray from the surface coating booth stacks (11, 14, 15 and 50) while one or more of the booths are in operation. The Compliance Response Plan shall be followed whenever a condition exists which should result in a response step. Failure to take response steps in accordance with Section C - Compliance Response Plan - Preparation, Implementation, Records, and Reports, shall be considered a violation of this permit.
- (b) Monthly inspections shall be performed of the coating emissions from stacks 11, 14, 15 and 50 and the presence of overspray on the rooftops and the nearby ground. The Compliance Response Plan for this unit shall contain troubleshooting contingency and response steps for when a noticeable change in overspray emission, or evidence of overspray emission is observed. The Compliance Response Plan shall be followed whenever a condition exists which should result in a response step. Failure to take response steps in accordance with Section C - Compliance Response Plan - Preparation, Implementation, Records, and Reports, shall be considered a violation of this permit.
- (c) Additional inspections and preventive measures shall be performed as prescribed in the Preventive Maintenance Plan.

D.1.13 Nonapplicability of Visible Emissions Notations

The requirement from FESOP 091-5035-00025, issued on December 11, 1996, Condition D.1.8, to perform daily visible emissions notations of the paint booth stack exhausts is not applicable because the daily inspections of the filter, weekly observations of the overspray from the stacks and monthly inspections of emissions required by Condition D.1.12 of this FESOP are sufficient compliance monitoring requirements to ensure compliance with the applicable rules. Thus, Condition D.1.8 of FESOP 091-5035-00025 is hereby rescinded.

Record Keeping and Reporting Requirements [326 IAC 2-8-4(3)] [326 IAC 2-8-16]

D.1.14 Record Keeping Requirements

- (a) To document compliance with Conditions D.1.1, D.1.2, D.1.3 and D.1.4, the Permittee shall maintain records in accordance with (1) through (5) below. Records maintained for (1) through (5) shall be taken monthly and shall be complete and sufficient to establish compliance with the VOC usage limits and the VOC emission limits established in Conditions D.1.1 and D.1.3, the solids usage limit and PM and PM₁₀ emission limit in Condition D.1.4, and the HAP usage limits established in Condition D.1.2.
 - (1) The amount and VOC, HAP and solids content of each coating material and solvent used. Records shall include purchase orders, invoices, and material safety data sheets (MSDS) necessary to verify the type and amount used. Solvent usage records shall differentiate between those added to coatings and those used as cleanup solvents;
 - (2) A log of the dates of use;
 - (3) The cleanup solvent usage for each month;
 - (4) The total VOC, total solids, individual HAP and total HAP usage for each month; and

- (5) The weight of VOCs, PM and PM₁₀, individual HAPs and total HAPs emitted for each compliance period.
- (b) To document compliance with Conditions D.1.4, D.1.5 and D.1.12, the Permittee shall maintain a log of weekly overspray observations, daily and monthly inspections, and those additional inspections prescribed by the Preventive Maintenance Plan.
- (c) All records shall be maintained in accordance with Section C - General Record Keeping Requirements, of this permit.

D.1.15 Reporting Requirements

A quarterly summary of the information to document compliance with Conditions D.1.1, D.1.2 and D.1.4 shall be submitted to the address listed in Section C - General Reporting Requirements, of this permit, using the reporting forms located at the end of this permit, or their equivalent, within thirty (30) days after the end of the quarter being reported. The report submitted by the Permittee does require the certification by the "authorized individual" as defined by 326 IAC 2-1.1-1(1).

SECTION D.2 FACILITY OPERATION CONDITIONS

Facility Description [326 IAC 2-8-4(10)]: Insignificant Activities

- (a) Natural gas-fired combustion sources with heat input equal to or less than ten million (10,000,000) Btu per hour, including many of the insignificant activities listed, and the following facilities with emissions resulting only from combustion:
 - (1) One (1) natural gas fired Core and Header dry off oven with a maximum heat input capacity of 2.0 million British thermal units per hour.
 - (2) Nine (9) natural gas fired makeup air units with maximum heat input capacities of 4.59 million British thermal units per hour, each.
 - (3) Fourteen (14) natural gas fired unit heaters with maximum heat input capacities of 0.17 million British thermal units per hour, each.
 - (4) Two (2) natural gas fired receiving heaters with maximum heat input capacities of 0.20 million British thermal units per hour, each.
 - (5) Three (3) natural gas fired unit heaters with maximum heat input capacities of 0.28 million British thermal units per hour, each.
- (b) Storage tanks with capacity less than or equal to 1,000 gallons and annual throughput less than 12,000 gallons.
- (c) The following equipment related to manufacturing activities not resulting in the emission of HAPs: brazing equipment, cutting torches, soldering equipment, welding equipment.[326 IAC 6-3-2]
- (d) Closed loop heating and cooling systems.
- (f) Activities associated with the treatment of wastewater streams with an oil and grease content less than or equal to one percent (1%) by volume.
- (g) Any operation using aqueous solutions containing less than one percent (1%) by weight of VOCs, excluding HAPs.
- (h) Paved and unpaved roads and parking lots with public access.
- (i) Blowdown for any of the following: sight glass; boiler; compressors; pumps; and cooling tower.
- (j) Stationary fire pumps.
- (k) The following lead sources with potential emissions less than 2.26 pounds per day: Five (5) solder dip pots; two (2) core bake ovens; two (2) hard tube mills; and one (1) core and header cooler.[326 IAC 6-3-2]
- (l) Four (4) Tungsten Inert Gas welding stations with a maximum hourly metal consumption per station of 0.000168 lbs/hr-station.[326 IAC 6-3-2]
- (m) One (1) MIG welding unit, identified as EU25, with a maximum capacity of 1.20 pounds of wire per hour.[326 IAC 6-3-2]
- (n) Nine (9) Metal Inert Gas (MIG) welding stations, identified as EU25, capacity: 3.328 pounds of wire per hour, each.[326 IAC 6-3-2]
- (o) One (1) Core and Header Cooler with a maximum product input capacity of 5,610 pounds per hour.

Facility Description [326 IAC 2-8-4(10)]: Insignificant Activities (continued)

- (p) One (1) brass/steel cleaning line, identified as EU46, equipped with one (1) alkaline tank, two (2) phosphoric acid tanks, one (1) rust inhibitor, and three (3) rinse tanks, all heated by natural gas combustion units totaling 5.5 million British thermal units per hour.
- (q) One (1) sheet metal dry-off and cooler, identified as EU47.
- (r) Final assembly and seaming operations, identified as EU51.[326 IAC 6-3-2]

(The information describing the process contained in this facility description box is descriptive information and does not constitute enforceable conditions.)

Emission Limitations and Standards [326 IAC 2-8-4(1)]

D.2.1 Particulate Matter (PM) [326 IAC 6-3-2]

Pursuant to 326 IAC 6-3-2, the particulate matter (PM) from the welding, brazing, soldering, cutting, assembly and seaming operations shall be limited to no more than 0.551 pounds per hour, each, when operating at process weight rates of 100 pounds per hour, each, or less. For process weight rates greater than 100 pounds per hour, PM emissions shall be limited by the following:

Interpolation of the data for the process weight rate up to sixty thousand (60,000) pounds per hour shall be accomplished by use of the equation:

$$E = 4.10 P^{0.67} \quad \text{where } E = \text{rate of emission in pounds per hour and} \\ P = \text{process weight rate in tons per hour}$$

Compliance Determination Requirements

There are no specific Compliance Determination Requirements applicable to these emission units.

Indiana Department of Environmental Management Office of Air Quality

Addendum to the Technical Support Document for Federally Enforceable State Operating Permit (FESOP) Renewal

Source Background and Description

Source Name: Modine Manufacturing Company
Source Location: 239 Factory Street, LaPorte, Indiana 46350
County: LaPorte
SIC Code: 3443
Operation Permit No.: F 091-14016-00025
Permit Reviewer: CarrieAnn Paukowits

On October 30, 2001, the Office of Air Quality (OAQ) had a notice published in the LaPorte Herald - Argus, LaPorte, Indiana, stating that Modine Manufacturing Company had applied for a Federally Enforceable State Operating Permit (FESOP) Renewal to operate a radiator and condenser manufacturing source with dry filters as control. The notice also stated that OAQ proposed to issue a permit for this operation and provided information on how the public could review the proposed permit and other documentation. Finally, the notice informed interested parties that there was a period of thirty (30) days to provide comments on whether or not this permit should be issued as proposed.

On November 12, 2001, Thomas Sanicola, of Modine Manufacturing Company, submitted comments on the proposed FESOP Renewal. The summary of the comments and corresponding responses are as follows (The permit language, if changed, has deleted language as ~~strikeouts~~ and new language **bolded.**):

Comment 1:

Page 26, Section D.1.7 - The current text should be modified to “using formulation data supplied by the coating manufacturer or other verifiable sources”. This allows outside testing of the coating if it is so desired.

Response 1:

All formulation data should be accurate when supplied by the coating manufacturer. There are no changes to the permit in response to this comment.

Comment 2:

Page 26, Section D.1.8 - Since the emissions from this source are tracked on a 12 consecutive month basis, the demonstration of compliance on a one month basis is inferred and should not be a separate permit requirement.

Response 2:

The limits in the FESOP are based on the consecutive twelve (12) month period ending each month. The source must be able to demonstrate compliance with the VOC emission limitation each month, based on the VOC usage for the most recent twelve (12) month period. Conditions D.1.1, D.1.2, D.1.4, D.1.8 and D.1.10 have been revised to clarify this requirement as follows:

D.1.1 Volatile Organic Compounds (VOC) [326 IAC 2-8-4]

- (a) The total volatile organic compound (VOC) delivered to the coating applicators at the three (3) paint booths, identified as EU8, EU11 and EU35, shall not exceed a total of 97.7 tons per **each** twelve (12) consecutive month period. This will limit the VOC emissions from the entire source, to less than one hundred (100) tons per year. Therefore, the requirements of 326 IAC 2-7 do not apply.
- (b) Condition D.1.1(a) from FESOP 091-5035-00025 issued on December 11, 1996, which states that the volatile organic compound (VOC) emissions from the three (3) paint booths (EU8, EU11, and EU35) shall not exceed 90.75 tons per 12 month total rolled on a monthly basis is not applicable because the VOC delivered to the applicators is limited by Condition D.1.1(a) of this FESOP to no more than 97.7 tons per year. This was determined by subtracting the potential to emit VOC from the total of all insignificant activities from 100 tons per year, and truncating the result so that the total is less than 100 tons per year. In FESOP 091-5035-00025, issued on December 11, 1996, the total annual allowable of 100 tons per year was reduced by one-twelfth (1/12) to insure that the source total will not exceed 100 tons per year, including insignificant activities. It has been determined that this source can emit up to 97.7 tons of VOC per year at the total of the three (3) paint booths and the total source potential to emit VOC will be less than 100 tons per year. Therefore, the limit is changed in this FESOP, and Condition D.1.1(a) of FESOP 091-5035-00025 is hereby rescinded.

D.1.2 Hazardous Air Pollutants (HAPs) Limitations [326 IAC 2-8-4]

- (a) The worst case single HAP delivered to the coating applicators at the three (3) paint booths, identified as EU8, EU11 and EU35, shall not exceed 9.58 tons per **each** twelve (12) consecutive month period, total. Therefore, the requirements of 326 IAC 2-7 do not apply.
- (b) The combination of HAPs delivered to the coating applicators in the three (3) paint booths, identified as EU8, EU11 and EU35, shall not exceed a total of twenty-four (24.0) tons per **each** twelve (12) consecutive month period. Therefore, the requirements of 326 IAC 2-7 do not apply.
- (c) Condition D.1.2 from FESOP 091-5035-00025 issued on December 11, 1996, which states that the hazardous air pollutant emissions shall be limited as follows: The amount of any single hazardous air pollutant (HAP) delivered to the applicators shall not exceed 8.25 tons per 12 month total rolled on a monthly basis; The amount of any combination of HAPs delivered to the applicators shall not exceed 22.0 tons per 12 month total rolled on a monthly basis, is not applicable because the HAP delivered to the applicators is limited by Conditions D.1.2 (a) and (b) of this FESOP to no more than 9.58 tons per consecutive twelve (12) month period of each individual HAP and 24.0 tons per consecutive twelve (12) month period of any combination of HAPs. This was determined by subtracting the potential to emit each individual HAP and the potential to emit total HAPs from the total of all insignificant activities from 10 and 25 tons per year, respectively, and truncating the results so that the totals are less than 10 and 25 tons per year. In FESOP 091-5035-00025, issued on December 11, 1996, the total annual allowables of 10 and 25 tons per year were reduced by one-twelfth (1/12) to insure that the source total will not exceed 10 tons of each individual HAP and 25 tons of total HAPs per year, including insignificant activities. It has been determined that this source can emit up to 9.58 tons of each individual HAP and 24.0 tons of any combination of HAPs per consecutive twelve (12) month period at the total of the three (3) paint booths and the total source potential to emit VOC will be less than 10 tons of each individual HAP and 25 tons of any combination of HAPs per year. Therefore, the limit is changed in this FESOP, and Condition D.1.2 of FESOP 091-5035-00025 is hereby rescinded.

D.1.4 Particulate Matter (PM and PM₁₀) [326 IAC 2-2] [40 CFR 52.21][326 IAC 2-8-4]

- (a) The solids delivered to the applicators at the three (3) paint booths (EU8, EU11 and EU35) shall not exceed 10,755 tons per **each** consecutive twelve (12) month period, based on a ten percent (10%) transfer efficiency, which is equivalent to a potential to emit PM₁₀ from the three (3) paint booths (EU8, EU11 and EU35) of no more than 96.8 tons per year and the potential to emit PM₁₀ from the total of all facilities at this source of less than 100 tons per year. Therefore, the requirements of 326 IAC 2-7 are not applicable. As a result of this PM₁₀ limit, and since PM is equal to PM₁₀ at the three (3) paint booths, the PM emissions from the entire source will be limited to 98.2 tons per year, and the requirements of 326 IAC 2-2, Prevention of Significant Deterioration, are also not applicable.
- (b) Condition D.1.3 from FESOP 091-5035-00025 issued on December 11, 1996, which states that the particulate matter (PM₁₀) emissions from the three (3) paint booths (EU8, EU11, and EU35) shall be limited to 22.6 pounds per hour, is not applicable because that limit did not take PM₁₀ emissions from insignificant activities into account. In Condition D.1.4(a) of this FESOP, the potential to emit PM₁₀ from the three (3) paint booths is limited to no more than 96.8 tons per consecutive twelve (12) month period. This was determined by subtracting the potential to emit PM₁₀ from the total of all insignificant activities from 100 tons per year, and truncating the result so that the total is less than 100 tons per year. Since the PM₁₀ emissions from this source are based on the operation of the dry filters, transfer efficiency of the applicators and the types and amounts of materials used, no hourly emission limit is required to show compliance with 326 IAC 2-8, FESOP. Therefore, the limit is changed in this FESOP, and Condition D.1.3 of FESOP 091-5035-00025 is hereby rescinded.

D.1.8 VOC Emissions

Compliance with Condition D.1.1 shall be demonstrated within 30 days of the end of each month based on the total volatile organic compound usage for the **most recent** twelve (12) month period.

D.1.10 Hazardous Air Pollutants (HAPs) Emissions

Compliance with Condition D.1.2 shall be demonstrated within 30 days of the end of each month based on the total single and combination of HAPs usage for the **most recent** twelve (12) month period ~~month~~.

Comment 3:

Page 26, Section D.1.9 - Same comment as Section D.1.7.

Response 3:

Condition D.1.9 does not contain the monthly requirement addressed in Comment 2.

Comment 4:

Page 26, Section D.1.10 - Same comment as Section D.1.8.

Response 4:

See Response 2.

Comment 5:

Page 27, Section D.1.12 - If daily inspections of the filters, along with the preventative maintenance that would result from the inspections, are completed as required, then the weekly inspection would

provide no benefit, would be a duplication of effort and would be burdensome. The weekly inspection should be eliminated as a requirement of this permit.

Response 5:

The daily monitoring requirements, such as verifying particle loading, is simply to ensure that the particulate material has been caught in the dry filters. This compliance monitoring condition is used as a trigger to indicate when response steps are needed of the facility. The weekly inspections are required to ensure that the dry filters are operating properly and controlling particulate emissions. Proper operation of the dry filters is necessary for the source to comply with 326 IAC 6-3-2, Process Operations, and 326 IAC 2-8-4, FESOP. Therefore, there are no changes to the permit in response to this comment.

Comment 6:

Page 27, Section D.1.14 -Condition (2), a log of date use, is unreasonable and burdensome. Since there is a cap on the total emissions of VOCs and HAPs, there is no reason to track the dates of use.

Response 6:

A log of dates of use is required to document compliance with 326 IAC 8-2-9, Miscellaneous Metal Coating. There are no changes to the permit in response to this comment.

Comment 7:

The requirement in Section D.1.14 -Condition (4) also is redundant as previously identified in the comment on Sections D.1.8 and D.1.10.

Response 7:

See Response 2.

Comment 8:

Section D.1.14 -Condition (b) should have the weekly observations eliminated as previously stated in the comment on Section D.1.12.

Response 8:

See Response 5.

Upon further review, the OAQ has decided to make the following changes to the FESOP: The permit language is changed to read as follows (deleted language appears as ~~strikeouts~~, new language is **bolded**):

Change 1:

Condition D.1.4 has been revised to specify the minimum control efficiency of the dry filters, which was used in developing the limit on solids delivered to the applicators.

D.1.4 Particulate Matter (PM and PM₁₀) [326 IAC 2-2] [40 CFR 52.21][326 IAC 2-8-4]

- (a) The solids delivered to the applicators at the three (3) paint booths (EU8, EU11 and EU35) shall not exceed 10,755 tons per each consecutive twelve (12) month period, based on a ten percent (10%) transfer efficiency **and a ninety-nine percent (99%) control efficiency**, which is equivalent to a potential to emit PM₁₀ from the three (3) paint booths (EU8, EU11 and EU35) of no more than 96.8 tons per year and the potential to emit PM₁₀ from the total of all facilities at this source of less than 100 tons per year. Therefore, the requirements of 326 IAC 2-7 are not applicable. As a result of this PM₁₀ limit, and since PM is equal to PM₁₀ at the three (3) paint booths, the PM emissions from the entire source will be limited to 98.2 tons per year, and the requirements of 326 IAC 2-2, Prevention of Significant Deterioration, are also not applicable.
- (b) Condition D.1.3 from FESOP 091-5035-00025 issued on December 11, 1996, which states that the particulate matter (PM₁₀) emissions from the three (3) paint booths (EU8, EU11, and EU35) shall be limited to 22.6 pounds per hour, is not applicable because that limit did not take PM₁₀ emissions from insignificant activities into account. In Condition D.1.4(a) of this FESOP, the potential to emit PM₁₀ from the three (3) paint booths is limited to no more than 96.8 tons per consecutive twelve (12) month period. This was determined by subtracting the potential to emit PM₁₀ from the total of all insignificant activities from 100 tons per year, and truncating the result so that the total is less than 100 tons per year. Since the PM₁₀ emissions from this source are based on the operation of the dry filters, transfer efficiency of the applicators and the types and amounts of materials used, no hourly emission limit is required to show compliance with 326 IAC 2-8, FESOP. Therefore, the limit is changed in this FESOP, and Condition D.1.3 of FESOP 091-5035-00025 is hereby rescinded.

Change 2:

- (a) Reports of deviations from permit requirements, test protocols, and Quarterly Deviation and Compliance Monitoring Reports should be submitted to the Compliance Data Section, and not the Compliance Branch. The address in Conditions B.15, Deviations from Permit Requirements and Conditions C.9, Performance Testing, and C.17, General Reporting Requirements, has been revised as follows:

Indiana Department of Environmental Management
Compliance ~~Branch~~ **Data Section**, Office of Air Quality
100 North Senate Avenue, P.O. Box 6015
Indianapolis, Indiana 46206-6015

- (b) The titles on the Certification and Quarterly Deviation, Compliance Monitoring Report and FESOP Quarterly Report forms are revised as follows:

INDIANA DEPARTMENT OF ENVIRONMENTAL MANAGEMENT
OFFICE OF AIR QUALITY
~~COMPLIANCE BRANCH~~
FEDERALLY ENFORCEABLE STATE OPERATING PERMIT (FESOP)
CERTIFICATION

INDIANA DEPARTMENT OF ENVIRONMENTAL MANAGEMENT
OFFICE OF AIR QUALITY
~~COMPLIANCE BRANCH~~ **DATA SECTION**
FEDERALLY ENFORCEABLE STATE OPERATING PERMIT (FESOP)
QUARTERLY DEVIATION AND COMPLIANCE MONITORING REPORT

INDIANA DEPARTMENT OF ENVIRONMENTAL MANAGEMENT
OFFICE OF AIR QUALITY
COMPLIANCE BRANCH **DATA SECTION**
FESOP Quarterly Report

Change 3:

Condition A.5, Prior Permits Superseded, replaced Prior Permit Conditions in the proposed permit to implement the intent of the new rule, 326 IAC 2-1.1-9.5, as follows:

~~A.5 Prior Permit Conditions~~

- ~~(a) This permit shall be used as the primary document for determining compliance with applicable requirements established by previously issued permits.~~
- ~~(b) If, after issuance of this permit, it is determined that the permit is in nonconformance with an applicable requirement that applied to the source on the date of permit issuance, including any term or condition from a previously issued construction or operation permit, IDEM, OAQ, shall immediately take steps to reopen and revise this permit and issue a compliance order to the Permittee to ensure expeditious compliance with the applicable requirement until the permit is reissued.~~

A.5 Prior Permits Superseded [326 IAC 2-1.1-9.5]

- (a) All terms and conditions of previous permits issued pursuant to permitting programs approved into the state implementation plan have been either**
- (1) incorporated as originally stated,**
 - (2) revised, or**
 - (3) deleted**
- by this permit.**
- (b) All previous registrations and permits are superseded by this permit.**

Change 4:

The IDEM, OAQ, has revised Condition B.15, Deviations from Permit Requirements and Conditions, to address concerns regarding the independent enforceability of permit conditions [see 326 IAC 2-8-4(5)]. Condition B.15 was revised to remove language that could be considered to grant exemptions from permit requirements and to clarify reporting obligations.

B.15 Deviations from Permit Requirements and Conditions [326 IAC 2-8-4(3)(C)(ii)]

- (a) Deviations from any permit requirements (for emergencies see Section B - Emergency Provisions), the probable cause of such deviations, and any response steps or preventive measures taken shall be reported to:**

Indiana Department of Environmental Management
Compliance Data Section, Office of Air Quality
100 North Senate Avenue, P.O. Box 6015
Indianapolis, Indiana 46206-6015

using the attached Quarterly Deviation and Compliance Monitoring Report, or its equivalent.
~~Deviations that are required to be reported by an applicable requirement~~ **A deviation**

required to be reported pursuant to an applicable requirement that exists independent of this permit, shall be reported according to the schedule stated in the applicable requirement and ~~to~~ **does** not need to be included in this report.

The ~~notification by the Permittee~~ **Quarterly Deviation and Compliance Monitoring Report** does require the certification by the "authorized individual" as defined by 326 IAC 2-1.1-1(1).

- (b) A deviation is an exceedance of a permit limitation or a failure to comply with a requirement of the permit ~~or a rule. It does not include:~~

~~(1) An excursion from compliance monitoring parameters as identified in Section D of this permit unless tied to an applicable rule or limit; or~~

~~(2) Failure to implement elements of the Preventive Maintenance Plan unless such failure has caused or contributed to a deviation.~~

~~A Permittee's failure to take the appropriate response step when an excursion of a compliance monitoring parameter has occurred is a deviation.~~

- (c) Emergencies shall be included in the Quarterly Deviation and Compliance Monitoring Report.

Change 5:

326 IAC 2-8-3 requires any application form, report, or compliance certification to be certified by the Authorized Individual. IDEM, OAQ has revised Condition C.8, Asbestos Abatement Projects, to clarify that the asbestos notification does not require a certification by the authorized individual, but it does need to be certified by the owner or operator. IDEM, OAQ has revised Condition C.15, Actions Related to Noncompliance Demonstrated by a Stack Test; a certification by the authorized individual is required for the notification sent in response to non-compliance with a stack test.

C.8 Asbestos Abatement Projects [326 IAC 14-10] [326 IAC 18] [40 CFR 61, Subpart M]

- (a) Notification requirements apply to each owner or operator. If the combined amount of regulated asbestos containing material (RACM) to be stripped, removed or disturbed is at least 260 linear feet on pipes or 160 square feet on other facility components, or at least thirty-five (35) cubic feet on all facility components, then the notification requirements of 326 IAC 14-10-3 are mandatory. All demolition projects require notification whether or not asbestos is present.

- (b) The Permittee shall ensure that a written notification is sent on a form provided by the Commissioner at least ten (10) working days before asbestos stripping or removal work or before demolition begins, per 326 IAC 14-10-3, and shall update such notice as necessary, including, but not limited to the following:

(1) When the amount of affected asbestos containing material increases or decreases by at least twenty percent (20%); or

(2) If there is a change in the following:

(A) Asbestos removal or demolition start date;

(B) Removal or demolition contractor; or

(C) Waste disposal site.

- (c) The Permittee shall ensure that the notice is postmarked or delivered according to the guidelines set forth in 326 IAC 14-10-3(2).
- (d) The notice to be submitted shall include the information enumerated in 326 IAC 14-10-3(3).

All required notifications shall be submitted to:

Indiana Department of Environmental Management
Asbestos Section, Office of Air Quality
100 North Senate Avenue, P.O. Box 6015
Indianapolis, Indiana 46206-6015

The notice shall include a signed certification from the owner or operator that the information provided in this notification is correct and that only Indiana licensed workers and project supervisors will be used to implement the asbestos removal project. The notifications do not require a certification by the "authorized individual" as defined by 326 IAC 2-1.1-1(1).

- (e) Procedures for Asbestos Emission Control
The Permittee shall comply with the applicable emission control procedures in 326 IAC 14-10-4 and 40 CFR 61.145(c). Per 326 IAC 14-10-4, emission control requirements are applicable for any removal or disturbance of RACM greater than three (3) linear feet on pipes or three (3) square feet on any other facility components or a total of at least 0.75 cubic feet on all facility components.
- (f) Indiana Accredited Asbestos Inspector
The Permittee shall comply with 326 IAC 14-10-1(a) that requires the owner or operator, prior to a renovation/demolition, to use an Indiana Accredited Asbestos Inspector to thoroughly inspect the affected portion of the facility for the presence of asbestos. The requirement that the inspector be accredited, pursuant to the provisions of 40 CFR 61, Subpart M, is federally enforceable.

C.15 Actions Related to Noncompliance Demonstrated by a Stack Test [326 IAC 2-8-4]
[326 IAC 2-8-5]

-
- (a) When the results of a stack test performed in conformance with Section C - Performance Testing, of this permit exceed the level specified in any condition of this permit, the Permittee shall take appropriate response actions. The Permittee shall submit a description of these response actions to IDEM, OAQ, within thirty (30) days of receipt of the test results. The Permittee shall take appropriate action to minimize excess emissions from the affected facility while the response actions are being implemented.
 - (b) A retest to demonstrate compliance shall be performed within one hundred twenty (120) days of receipt of the original test results. Should the Permittee demonstrate to IDEM, OAQ that retesting in one-hundred and twenty (120) days is not practicable, IDEM, OAQ may extend the retesting deadline.
 - (c) IDEM, OAQ reserves the authority to take any actions allowed under law in response to noncompliant stack tests.

The documents submitted pursuant to this condition **do not** require the certification by the "authorized individual" as defined by 326 IAC 2-1.1-1(1).

Change 6:

The IDEM, OAQ has restructured Condition C.14 to clarify the contents and implementation of the compliance response plan. The name of the condition has been changed to better reflect the contents of the condition. The language regarding the OAQ's discretion to excuse failure to perform monitoring under certain conditions has been deleted. The OAQ retains this discretion to excuse minor incidents of missing data; however, it is not necessary to state criteria regarding the exercise of that discretion in the permit. References to this condition throughout the proposed permit have been revised to reflect the name change of this condition. The proposed condition, and the conditions which reference this condition, have been changed as follows:

C.14 Compliance Monitoring Response Plan - Failure to Take Response Steps Preparation, Implementation, Records, and Reports [326 IAC 2-8-4] [326 IAC 2-8-5]

- (a) The Permittee is required to **prepare** ~~implement: a compliance monitoring plan to ensure that reasonable information is available to evaluate its continuous compliance with applicable requirements. The compliance monitoring plan can be either an entirely new document, consist in whole of information contained in other documents, or consist of a combination of new information and information contained in other documents. If the compliance monitoring plan incorporates by reference information contained in other documents, the Permittee shall identify as part of the compliance monitoring plan the documents in which the information is found. The elements of the compliance monitoring plan are:~~
- ~~(1) This condition;~~
 - ~~(2) The Compliance Determination Requirements in Section D of this permit;~~
 - ~~(3) The Compliance Monitoring Requirements in Section D of this permit;~~
 - ~~(4) The Record Keeping and Reporting Requirements in Section C (General Record Keeping Requirements, and General Reporting Requirements) and in Section D of this permit; and~~
 - ~~(5) A a Compliance Response Plan (CRP) for each compliance monitoring condition of this permit. A CRP's shall be submitted to IDEM, OAQ, upon request and shall be subject to review and approval by IDEM, OAQ, (and local agency if applicable). The CRP shall be prepared within ninety (90) days after issuance of this permit by the Permittee, **supplemented from time to time by the Permittee**, and maintained on site, and is comprised of:~~
 - ~~(A)(1) Reasonable response steps that may be implemented in the event that compliance-related information indicates that a response step is needed pursuant to the requirements of Section D of this permit; and **an expected timeframe for taking reasonable response steps.**~~
 - ~~(B) A time schedule for taking reasonable response steps including a schedule for devising additional response steps for situations that may not have been predicted.~~
- (2) **If, at any time, the Permittee takes reasonable response steps that are not set forth in the Permittee's current Compliance Response Plan and the Permittee documents such response in accordance with subsection (e) below, the Permittee shall amend its Compliance Response Plan to include such response steps taken.**

- (b) For each compliance monitoring condition of this permit, reasonable response steps shall be taken when indicated by the provisions of that compliance monitoring condition **as follows:**
~~Failure to take reasonable response steps may constitute a violation of the permit.~~
- (1) **Reasonable response steps shall be taken as set forth in the Permittee's current Compliance Response Plan; or**
 - (2) **If none of the reasonable response steps listed in the Compliance Response Plan is applicable or responsive to the excursion, the Permittee shall devise and implement additional response steps as expeditiously as practical. Taking such additional response steps shall not be considered a deviation from this permit so long as the Permittee documents such response steps in accordance with this condition.**
 - (3) **If the Permittee determines that additional response steps would necessitate that the emissions unit or control device be shut down, the IDEM, OAQ shall be promptly notified of the expected date of the shut down, the status of the applicable compliance monitoring parameter with respect to normal, and the results of the actions taken up to the time of notification.**
 - (4) **Failure to take reasonable response steps shall constitute a violation of the permit.**
- (c) ~~Upon investigation of a compliance monitoring excursion, the~~ **The** Permittee is ~~excused from taking~~ **not required to take any** further response steps for any of the following reasons:
- (1) A false reading occurs due to the malfunction of the monitoring equipment ~~and This shall be an excuse from taking further response steps providing that prompt action was taken to correct the monitoring equipment.~~
 - (2) The Permittee has determined that the compliance monitoring parameters established in the permit conditions are technically inappropriate, has previously submitted a request for an administrative amendment to the permit, and such request has not been denied.
 - (3) An automatic measurement was taken when the process was not operating.
 - (4) The process has already returned or is returning to operating within "normal" parameters and no response steps are required.
- (d) **When implementing reasonable steps in response to a compliance monitoring condition, if the Permittee determines that an exceedance of an emission limitation has occurred, the Permittee shall report such deviations pursuant to Section B-Deviations from Permit Requirements and Conditions.**
- ~~(d)(e)~~ **(e)** ~~Records shall be kept of all instances in which the compliance related information was not met and of all response steps taken. The Permittee shall record all instances when response steps are taken.~~ In the event of an emergency, the provisions of 326 IAC 2-7-16 (Emergency Provisions) requiring prompt corrective action to mitigate emissions shall prevail.
- ~~(e)(f)~~ **(f)** ~~Except as otherwise provided by a rule or provided specifically in Section D, all monitoring as required in Section D shall be performed at all times when the equipment emission unit is operating, except for time necessary to perform quality assurance and mainten-~~

ance activities. If monitoring is required by Section D and the equipment is not operating, then the Permittee may record the fact that the equipment is not operating or perform the required monitoring.

- (f) ~~At its discretion, IDEM may excuse the Permittee's failure to perform the monitoring and record keeping as required by Section D, if the Permittee provides adequate justification and documents that such failures do not exceed five percent (5%) of the operating time in any quarter. Temporary, unscheduled unavailability of qualified staff shall be considered a valid reason for failure to perform the monitoring or record keeping requirements in Section D.~~

D.1.12 Monitoring

- (a) Daily inspections shall be performed to verify the placement, integrity and particle loading of the filters. To monitor the performance of the dry filters, weekly observations shall be made of the overspray from the surface coating booth stacks (11, 14, 15 and 50) while one or more of the booths are in operation. The Compliance Response Plan shall be followed whenever a condition exists which should result in a response step. Failure to take response steps in accordance with Section C - Compliance ~~Monitoring Response Plan - Failure to Take Response Steps~~ **Preparation, Implementation, Records, and Reports**, shall be considered a violation of this permit.
- (b) Monthly inspections shall be performed of the coating emissions from stacks 11, 14, 15 and 50 and the presence of overspray on the rooftops and the nearby ground. The Compliance Response Plan for this unit shall contain troubleshooting contingency and response steps for when a noticeable change in overspray emission, or evidence of overspray emission is observed. The Compliance Response Plan shall be followed whenever a condition exists which should result in a response step. Failure to take response steps in accordance with Section C - Compliance ~~Monitoring Response Plan - Failure to Take Response Steps~~ **Preparation, Implementation, Records, and Reports**, shall be considered a violation of this permit.
- (c) Additional inspections and preventive measures shall be performed as prescribed in the Preventive Maintenance Plan.

Change 7:

The language stating that the condition is not federally enforceable has been removed from Conditions C.3, C.4, C.5 and C.7. Federal law states that failure to comply with any permit condition issued under a program that has been approved into a State Implementation Plan (SIP) is to be treated as a violation of the SIP (40 CFR 52.23). This has the effect of making all FESOP conditions federally enforceable. Indiana's FESOP program was approved as a part of Indiana's SIP at 40 CFR 52.788. Neither the program nor the underlying rule, 326 IAC 2-8 contains provisions for designating certain conditions as not federally enforceable.

C.3 Open Burning [326 IAC 4-1] [IC 13-17-9]

The Permittee shall not open burn any material except as provided in 326 IAC 4-1-3, 326 IAC 4-1-4 or 326 IAC 4-1-6. The previous sentence notwithstanding, the Permittee may open burn in accordance with an open burning approval issued by the Commissioner under 326 IAC 4-1-4.1. ~~326 IAC 4-1-3(a)(2)(A) and (B) are not federally enforceable.~~

C.4 Incineration [326 IAC 4-2] [326 IAC 9-1-2(3)]

The Permittee shall not operate an incinerator or incinerate any waste or refuse except as provided in 326 IAC 4-2 and in 326 IAC 9-1-2. ~~326 IAC 9-1-2 is not federally enforceable.~~

C.5 Fugitive Dust Emissions [326 IAC 6-4]

The Permittee shall not allow fugitive dust to escape beyond the property line or boundaries of the property, right-of-way, or easement on which the source is located, in a manner that would violate 326 IAC 6-4 (Fugitive Dust Emissions). ~~326 IAC 6-4-2(4) is not federally enforceable.~~

C.7 Stack Height [326 IAC 1-7]

The Permittee shall comply with the applicable provisions of 326 IAC 1-7 (Stack Height Provisions), for all exhaust stacks through which a potential (before controls) of twenty-five (25) tons per year or more of particulate matter or sulfur dioxide is emitted. ~~The provisions of 326 IAC 1-7-2, 326 IAC 1-7-3(c) and (d), 326 IAC 1-7-4(d)(3), (e), and (f), and 326 IAC 1-7-5(d) are not federally enforceable.~~

**Indiana Department of Environmental Management
Office of Air Quality**

**Technical Support Document (TSD)
for a Federally Enforceable State Operating Permit (FESOP) Renewal**

Source Background and Description

Source Name:	Modine Manufacturing Company
Source Location:	239 Factory Street, LaPorte, Indiana 46350
County:	LaPorte
SIC Code:	3443
Operation Permit No.:	F 091-14016-00025
Permit Reviewer:	CarrieAnn Paukowits

The Office of Air Quality (OAQ) has reviewed a FESOP renewal application from Modine Manufacturing Company relating to the operation of a radiator and condenser manufacturing source. Modine Manufacturing Company was issued FESOP 091-5035-00025, on December 11, 1996.

Permitted Emission Units and Pollution Control Equipment

The source consists of the following permitted emission units and pollution control devices:

- (a) One (1) paint booth, known as the Core and Header Paint Booth (EU8), equipped with air atomization spray guns and dry filters for air pollution control and exhausting to stack 11, capacity 15.0 metal parts per hour.
- (b) One (1) paint booth, known as the Sheet Metal Paint Booth (EU11), equipped with air atomization spray guns and dry filters for air pollution control and exhausting to stacks 14 and 15, capacity 30.0 metal parts per hour.
- (c) One (1) paint booth, known as the Bolted Paint Booth (EU35), equipped with air atomization spray guns and dry filters for air pollution control and exhausting to stack 50, capacity 15.0 metal parts per hour.

Unpermitted Emission Units and Pollution Control Equipment

There are no unpermitted facilities operating at this source during this review process.

New Emission Units and Pollution Control Equipment Receiving New Source Review Approval

There are no new facilities proposed at this source during this review process.

Insignificant Activities

The source also consists of the following insignificant activities, as defined in 326 IAC 2-7-1(21):

- (a) Natural gas-fired combustion sources with heat input equal to or less than ten million (10,000,000) Btu per hour, including many of the insignificant activities listed, and the following facilities with emissions resulting only from combustion:

- (1) One (1) natural gas fired Core and Header dry off oven with a maximum heat input capacity of 2.0 million British thermal units per hour.
 - (2) Nine (9) natural gas fired makeup air units with maximum heat input capacities of 4.59 million British thermal units per hour, each.
 - (3) Fourteen (14) natural gas fired unit heaters with maximum heat input capacities of 0.17 million British thermal units per hour, each.
 - (4) Two (2) natural gas fired receiving heaters with maximum heat input capacities of 0.20 million British thermal units per hour, each.
 - (5) Three (3) natural gas fired unit heaters with maximum heat input capacities of 0.28 million British thermal units per hour, each.
- (b) Storage tanks with capacity less than or equal to 1,000 gallons and an annual throughput less than 12,000 gallons.
 - (c) The following equipment related to manufacturing activities not resulting in the emission of HAPs: brazing equipment, cutting torches, soldering equipment, welding equipment. [326 IAC 6-3-2]
 - (d) Closed loop heating and cooling systems.
 - (f) Activities associated with the treatment of wastewater streams with an oil and grease content less than or equal to one percent (1%) by volume.
 - (g) Any operation using aqueous solutions containing less than one percent (1%) by weight of VOCs, excluding HAPs.
 - (h) Paved and unpaved roads and parking lots with public access.
 - (i) Blowdown for any of the following: sight glass; boiler; compressors; pumps; and cooling tower.
 - (j) Stationary fire pumps.
 - (k) The following lead sources with potential emissions less than 2.26 pounds per day: Five (5) solder dip pots; two (2) core bake ovens; two (2) hard tube mills; and one (1) core and header cooler.[326 IAC 6-3-2]
 - (l) Four (4) Tungsten Inert Gas welding stations with a maximum hourly metal consumption per station of 0.000168 lbs/hr-station.[326 IAC 6-3-2]
 - (m) One (1) MIG welding unit, identified as EU25, with a maximum capacity of 1.20 pounds of wire per hour.[326 IAC 6-3-2]
 - (n) Nine (9) Metal Inert Gas (MIG) welding stations, identified as EU25, capacity: 3.328 pounds of wire per hour, each.[326 IAC 6-3-2]
 - (o) One (1) Core and Header Cooler with a maximum product input capacity of 5,610 pounds per hour.
 - (p) One (1) brass/steel cleaning line, identified as EU46, equipped with one (1) alkaline tank,

two (2) phosphoric acid tanks, one (1) rust inhibitor, and three (3) rinse tanks, all heated by natural gas combustion units totaling 5.5 million British thermal units per hour.

- (q) One (1) sheet metal dry-off and cooler, identified as EU47.
- (r) Final assembly and seaming operations, identified as EU51. [326 IAC 6-3-2]

Existing Approvals

- (a) FESOP 091-5035-00025, issued on December 11, 1996 and expires on December 11, 2001;
- (b) Exempt Construction and Operation Status 091-8205-00025, issued on March 4, 1997;
- (c) First Minor Permit Modification 091-8588-00025, issued on August 12, 1997;
- (d) First Administrative Amendment 091-8954-00025, issued on September 18, 1997;
- (e) Exempt Construction and Operation Status and Second Administrative Amendment 091-9877-00025, issued on July 10, 1998;
- (f) Registered Construction and Operation Status and Third Administrative Amendment 091-10297-00025, issued on April 20, 1999; and
- (g) Fourth Administrative Amendment AAF 091-12719-00025, issued on November 2, 2000.

All conditions from previous approvals were incorporated into this FESOP except the following:

FESOP 091-5035-00025 issued on December 11, 1996

- (a) Condition D.1.1(a): The volatile organic compound (VOC) emissions from the three (3) paint booths (EU8, EU11, and EU35) will not exceed 90.75 tons per 12-month total rolled on a monthly basis. Therefore, the requirements of 326 IAC 2-7 do not apply.

Reason not incorporated: The VOC delivered to the applicators is limited by this FESOP to no more than 97.7 tons per year. This was determined by subtracting the potential to emit VOC from the total of all insignificant activities from 100 tons per year, and truncating the result so that the total is less than 100 tons per year. In FESOP 091-5035-00025, issued on December 11, 1996, the total annual allowable of 100 tons per year was reduced by one-twelfth (1/12) to insure that the source total will not exceed 100 tons per year, including insignificant activities. It has been determined that this source can emit up to 97.7 tons of VOC per year at the total of the three (3) paint booths and the total source potential to emit VOC will be less than 100 tons per year. Therefore, the limit is changed in this FESOP.

- (b) Condition D.1.3: The particulate matter (PM₁₀) emissions from the three (3) paint booths (EU8, EU11, and EU35) shall be limited to 22.6 pounds per hour (lb/hr). Therefore, the requirements of 326 IAC 2-7 do not apply.

Reason not incorporated: The limit in FESOP 091-5035-00025 did not take PM₁₀ emissions from insignificant activities into account. In this FESOP, the potential to emit PM₁₀ from the three (3) paint booths is limited to no more than 96.8 tons per consecutive twelve (12) month period. This was determined by subtracting the potential to emit PM₁₀ from the total of all insignificant activities from 100 tons per year, and truncating the result so that the total

is less than 100 tons per year. Since the PM_{10} emissions from this source are based on the operation of the dry filters, transfer efficiency of the applicators and the types and amounts of materials used, no hourly emission limit is required to show compliance with 326 IAC 2-8, FESOP. Therefore, the limit is changed in this FESOP.

- (c) Condition D.1.2: The hazardous air pollutant emissions shall be limited as follows: The amount of any single hazardous air pollutant (HAP) delivered to the applicators shall not exceed 8.25 tons per 12 month total rolled on a monthly basis. The amount of any combination of HAPs delivered to the applicators shall not exceed 22.0 tons per 12 month total rolled on a monthly basis.

Reason not incorporated: The HAP delivered to the applicators is limited by this FESOP to no more than 9.58 tons per consecutive twelve (12) month period of each individual HAP and 24.0 tons per consecutive twelve (12) month period of any combination of HAPs. This was determined by subtracting the potential to emit each individual HAP and the potential to emit total HAPs from the total of all insignificant activities from 10 and 25 tons per year, respectively, and truncating the results so that the totals are less than 10 and 25 tons per year. In FESOP 091-5035-00025, issued on December 11, 1996, the total annual allowables of 10 and 25 tons per year were reduced by one-twelfth (1/12) to insure that the source total will not exceed 10 tons of each individual HAP and 25 tons of total HAPs per year, including insignificant activities. It has been determined that this source can emit up to 9.58 tons of each individual HAP and 24.0 tons of any combination of HAPs per consecutive twelve (12) month period at the total of the three (3) paint booths and the total source potential to emit VOC will be less than 10 tons of each individual HAP and 25 tons of any combination of HAPs per year. Therefore, the limit is changed in this FESOP.

- (d) Condition D.1.8: Daily visible emissions notations of the paint booth stack exhausts shall be performed during normal daylight operations. A trained employee will record whether emissions are normal or abnormal. For processes operated continuously "normal" means those conditions prevailing, or expected to prevail, eighty percent (80%) of the time the process is in operation, not counting startup or shut down time. In the case of batch or discontinuous operations, readings shall be taken during that part of the operation that would normally be expected to cause the greatest emissions. A trained employee is an employee who has worked at the plant at least one (1) month and has been trained in the appearance and characteristics of normal visible emissions for that specific process. The Preventive Maintenance Plan for this unit shall contain troubleshooting contingency and response steps for when an abnormal emission is observed.

Reason not incorporated: The daily inspections of the filter, weekly observations of the overspray from the stacks and monthly inspections of emissions required in this FESOP are sufficient compliance monitoring requirements to ensure compliance with the applicable rules.

Enforcement Issue

There are no enforcement actions pending.

Recommendation

The staff recommends to the Commissioner that the FESOP Renewal be approved. This recommendation is based on the following facts and conditions:

Unless otherwise stated, information used in this review was derived from the application and

additional information submitted by the applicant.

An administratively complete FESOP Renewal application for the purposes of this review was received on March 5, 2001. Additional information was received on June 25, 2001.

There was no notice of completeness letter mailed to the source.

Emission Calculations

See pages 1 and 2 of 2 of Appendix A of this document for detailed emissions calculations.

Unrestricted Potential Emissions

This table reflects the unrestricted potential emissions of the source, excluding the emission limits that were contained in the previous FESOP.

Pollutant	Unrestricted Potential Emissions (tons/year)
PM	greater than 250
PM ₁₀	greater than 250
SO ₂	less than 25
VOC	greater than 100
CO	less than 100
NO _x	less than 100

Note: For the purpose of determining Title V applicability for particulates, PM₁₀, not PM, is the regulated pollutant in consideration.

HAPs	Unrestricted Potential Emissions (tons/year)
Lead	less than 10
Glycol Ethers	greater than 10
TOTAL	greater than 25

- (a) The unrestricted potential to emit (as defined in 326 IAC 2-1.1-1(16)) of PM₁₀ and VOC are equal to or greater than 100 tons per year. Therefore, the source is subject to the provisions of 326 IAC 2-7.
- (b) The unrestricted potential to emit (as defined in 326 IAC 2-1.1-1(16)) of any single HAP is equal to or greater than ten (10) tons per year and the unrestricted potential to emit (as defined in 326 IAC 2-1.1-1(16)) of a combination HAPs is greater than or equal to twenty-five (25) tons per year. Therefore, the source is subject to the provisions of 326 IAC 2-7.
- (c) Fugitive Emissions

Since this type of operation is not one of the twenty-eight (28) listed source categories under 326 IAC 2-2 and since there are no applicable New Source Performance Standards that were in effect on August 7, 1980, the fugitive emissions are not counted toward determination of PSD and Emission Offset applicability.

Potential to Emit After Issuance

The source, issued a FESOP on December 11, 1996, has opted to remain a FESOP source, rather than apply for a Part 70 Operating Permit. The table below summarizes the potential to emit, reflecting all limits, of the emission units. Any control equipment is considered enforceable only after issuance of this Federally Enforceable State Operating Permit and only to the extent that the effect of the control equipment is made practically enforceable in the permit.

	Potential to Emit After Issuance (tons/year)						
Process/emission unit	PM	PM ₁₀	SO ₂	VOC	CO	NO _x	HAPs
Three (3) paint booths (EU8, EU11 and EU35)	No more than 96.8	No more than 96.8	-	No more than 97.7	-	-	Individual 9.58 Total 24.0
Insignificant Activities	1.44	3.11	0.246	2.25	32.9	40.7	Lead 0.412 Total 0.966
Total PTE After Issuance	98.2	Less than 100	0.246	Less than 100	32.9	40.7	Single less than 10 Total less than 25

The emission rates in this table represent the potential to emit from the total of all insignificant activities and the limited emission rates from the three (3) paint booths (EU8, EU11 and EU35) to ensure compliance with 326 IAC 2-8, FESOP. Since PM emissions from the three (3) paint booths are equal to PM₁₀ emissions, the potential to emit PM is limited as a result of the limit on PM₁₀ emissions.

County Attainment Status

The source is located in LaPorte County.

Pollutant	Status
PM ₁₀	Attainment
SO ₂	Attainment
NO ₂	Attainment
Ozone	Attainment
CO	Attainment
Lead	Attainment

- (a) Volatile organic compounds (VOC) and oxides of nitrogen (NO_x) are precursors for the

formation of ozone. Therefore, VOC and NO_x emissions are considered when evaluating the rule applicability relating to the ozone standards. LaPorte County has been designated as attainment or unclassifiable for ozone.

- (b) LaPorte County has been classified as attainment or unclassifiable for all remaining criteria pollutants. Therefore, these emissions were reviewed pursuant to the requirements for Prevention of Significant Deterioration (PSD), 326 IAC 2-2 and 40 CFR 52.21.

Federal Rule Applicability

- (a) There are still no New Source Performance Standards (NSPS)(326 IAC 12 and 40 CFR Part 60) applicable to this source.
- (b) There are still no National Emission Standards for Hazardous Air Pollutants (NESHAPs) (326 IAC 14, 326 IAC 20, 40 CFR Part 61 and 40 CFR Part 63) applicable to this source.

State Rule Applicability - Entire Source

326 IAC 2-6 (Emission Reporting)

This source is located in LaPorte County and the potentials to emit PM₁₀ and VOC are limited to less than one hundred (100) tons per year. Therefore, 326 IAC 2-6 does not apply.

326 IAC 2-8-4 (FESOP)

Pursuant to this rule, the amount of PM₁₀, SO₂, VOC, CO and NO_x shall be limited to less than one hundred (100) tons per year. In addition, the amount of a single HAP shall be limited to less than ten (10) tons per year and the combination of all HAPs shall be limited to less than twenty-five (25) tons per year. Therefore, the requirements of 326 IAC 2-7, do not apply.

- (a) The amount of VOC delivered to the applicators at the total of the three (3) paint booths (EU8, EU11 and EU35) shall be limited to no more than 97.7 tons per consecutive twelve (12) month period. This will limit the potential to emit VOC from the entire source to less than 100 tons per year and shall make the requirements of 326 IAC 2-7, not applicable.
- (b) HAP emissions will be limited as follows:
 - (1) The worst case single HAP delivered to the coating applicators at the three (3) paint booths (EU8, EU11 and EU35) shall not exceed 9.58 tons per twelve (12) consecutive month period, total. Therefore, the requirements of 326 IAC 2-7 do not apply.
 - (2) The combination of HAPs delivered to the coating applicators in the three (3) paint booths (EU8, EU11 and EU35) shall not exceed a total of twenty-four (24.0) tons per twelve (12) consecutive month period. Therefore, the requirements of 326 IAC 2-7 do not apply.
- (c) The solids delivered to the applicators at the three (3) paint booths (EU8, EU11 and EU35) shall not exceed 10,755 tons per consecutive twelve (12) month period, based on a ten percent (10%) transfer efficiency, which is equivalent to PM₁₀ emissions of 96.8 tons per year from the total of the three (3) paint booths and less than 100 tons per year from the total of all facilities at this source, when operating the dry filters at all times when the three (3) paint booths are in operation. Therefore, the requirements of 326 IAC 2-7 are not applicable. As a result of this PM₁₀ limit, and since PM is equal to PM₁₀ at the three (3) paint

booths, the PM emissions from the entire source will be limited to 98.2 tons per year, and the requirements of 326 IAC 2-2, Prevention of Significant Deterioration, are not applicable.

326 IAC 5-1 (Visible Opacity Limitations)

Pursuant to 326 IAC 5-1-2 (Opacity limitations), except as provided in 326 IAC 5-1-3 (Temporary alternative opacity limitations), opacity shall meet the following, unless otherwise stated in this permit:

- (a) Opacity shall not exceed an average of forty percent (40%) any one (1) six (6) minute averaging period as determined in 326 IAC 5-1-4.
- (b) Opacity shall not exceed sixty percent (60%) for more than a cumulative total of fifteen (15) minutes (sixty (60) readings as measured according to 40 CFR Part 60, Appendix A, Method 9 or fifteen (15) one (1) minute nonoverlapping integrated averages for a continuous opacity monitor) in a six (6) hour period.

State Rule Applicability - Individual Facilities

326 IAC 8-2-9 (Miscellaneous Metal Coating)

Pursuant to 326 IAC 8-2-9 (Miscellaneous Metal Coating Operations), the volatile organic compound (VOC) content of coating delivered to the applicators at the three (3) paint booths (EU8, EU11 and EU35) shall be limited to 3.5 pounds of VOCs per gallon of coating less water for air dried and forced warm air dried coatings.

Solvent sprayed from application equipment during cleanup or color changes shall be directed into containers. Such containers shall be closed as soon as such solvent spraying is complete, and the waste solvent shall be disposed of in such a manner that evaporation is minimized.

Based on the MSDSs submitted by the source and calculations made, the three (3) paint booths are in compliance with this requirement.

326 IAC 6-3-2 (Process Operations)

- (a) Pursuant to 326 IAC 6-3-2, the particulate matter (PM) from the three (3) paint booths (EU8, EU11 and EU35) shall be limited by the following:

Interpolation of the data for the process weight rate up to sixty thousand (60,000) pounds per hour shall be accomplished by use of the equation:

$$E = 4.10 P^{0.67} \quad \text{where } E = \text{rate of emission in pounds per hour and} \\ P = \text{process weight rate in tons per hour}$$

The dry filters shall be in operation at all times and control emissions from the three (3) paint booths at all times when the paint booths are in operation, in order to comply with this limit.

- (b) Pursuant to 326 IAC 6-3-2, the particulate matter (PM) from the welding, brazing, soldering, cutting, assembly and seaming operations shall be limited to no more than 0.551 pounds per hour, each, when operating at process weight rates of 100 pounds per hour, each, or less. For process weight rates greater than 100 pounds per hour, PM emissions shall be limited by the following:

Interpolation of the data for the process weight rate up to sixty thousand (60,000) pounds per hour shall be accomplished by use of the equation:

$$E = 4.10 P^{0.67} \quad \text{where } E = \text{rate of emission in pounds per hour and} \\ P = \text{process weight rate in tons per hour}$$

Testing Requirements

There is still no testing required for this source.

Compliance Requirements

Permits issued under 326 IAC 2-8 are required to ensure that sources can demonstrate compliance with applicable state and federal rules on a more or less continuous basis. All state and federal rules contain compliance provisions, however, these provisions do not always fulfill the requirement for a more or less continuous demonstration. When this occurs IDEM, OAQ, in conjunction with the source, must develop specific conditions to satisfy 326 IAC 2-8-4. As a result, compliance requirements are divided into two sections: Compliance Determination Requirements and Compliance Monitoring Requirements.

Compliance Determination Requirements in Section D of the permit are those conditions that are found more or less directly within state and federal rules and the violation of which serves as grounds for enforcement action. If these conditions are not sufficient to demonstrate continuous compliance, they will be supplemented with Compliance Monitoring Requirements, also Section D of the permit. Unlike Compliance Determination Requirements, failure to meet Compliance Monitoring conditions would serve as a trigger for corrective actions and not grounds for enforcement action. However, a violation in relation to a compliance monitoring condition will arise through a source's failure to take the appropriate corrective actions within a specific time period.

The compliance monitoring requirements applicable to the three (3) paint booths (EU8, EU11 and EU35) are as follows:

- (a) Daily inspections shall be performed to verify the placement, integrity and particle loading of the filters. To monitor the performance of the dry filters, weekly observations shall be made of the overspray from the paint booth stacks (11, 14, 15 and 50) while one or more of the booths are in operation. The Compliance Response Plan shall be followed whenever a condition exists which should result in a response step. Failure to take response steps in accordance with Section C - Compliance Monitoring Plan - Failure to Take Response Steps, shall be considered a violation of this permit.
- (b) Monthly inspections shall be performed of the coating emissions from the stacks (EU8, EU11 and EU35) and the presence of overspray on the rooftops and the nearby ground. The Compliance Response Plan for this unit shall contain troubleshooting contingency and response steps for when a noticeable change in overspray emission, or evidence of overspray emission is observed. The Compliance Response Plan shall be followed whenever a condition exists which should result in a response step. Failure to take response steps in accordance with Section C - Compliance Monitoring Plan - Failure to Take Response Steps, shall be considered a violation of this permit.
- (c) Additional inspections and preventive measures shall be performed as prescribed in the Preventive Maintenance Plan.

All compliance requirements from previous approvals were incorporated into this FESOP except the

following:

Daily visible emissions notations of the paint booth stack exhausts shall be performed during normal daylight operations. A trained employee will record whether emissions are normal or abnormal. For processes operated continuously "normal" means those conditions prevailing, or expected to prevail, eighty percent (80%) of the time the process is in operation, not counting startup or shut down time. In the case of batch or discontinuous operations, readings shall be taken during that part of the operation that would normally be expected to cause the greatest emissions. A trained employee is an employee who has worked at the plant at least one (1) month and has been trained in the appearance and characteristics of normal visible emissions for that specific process. The Preventive Maintenance Plan for this unit shall contain troubleshooting contingency and response steps for when an abnormal emission is observed.

Reason not incorporated: The daily inspections of the filter, weekly observations of the overspray from the stacks and monthly inspections of emissions required in this FESOP are sufficient compliance monitoring requirements to ensure compliance with the applicable rules.

These monitoring conditions are necessary because the dry filters for the paint booths must operate properly to ensure compliance with 326 IAC 6-3 (Process Operations) and 326 IAC 2-8 (FESOP) and to make the requirements of 326 IAC 2-2, PSD, still not applicable.

Conclusion

The operation of this radiator and condenser manufacturing source shall be subject to the conditions of the attached proposed FESOP No.: F 091-14016-00025.
